

# PBIS

**Positive Behavior Interventions and Supports**

## **FROM FBA TO FUNCTIONALLY-ALIGNED BIPS: TIER 3**

**KATIE ELLIOTT**

# PURPOSE

- **Build a shared understanding of the function of behavior and how it drives intervention.**
- **Strengthen the team's ability to create high-quality FBAs and BIPs that are practical and consistently implemented.**
- **Increase fidelity and equity within Tier 3 systems by aligning behavior plans with PBIS principles.**

Intentions

# WHAT IS PBIS?

# FROM FBA TO FUNCTIONALLY-ALIGNED BIPS: TIER 3

- Functional Behavior Assessment Multi-Component Behavior Plans
- School-Based Wraparound
- Emergency Intervention Plans
- Intensive Academic Support

**FEW**

Source: <https://www.resa.net/educational-resources/pbis/>

# DEFINITION AND PURPOSE: FBA/BIP

The process of applying scientific principles to discover the reason for behavior, and to develop interventions that lead to meaningful outcomes.

# PRINCIPLES OF BEHAVIOR

- **Behavior is communicative**

What is the person telling us about their needs?

- **Behavior is purposeful**

What is the person trying to obtain or avoid?

- **Behavior is predictable**

What patterns exist?

- **Behavior is learned**

What new behaviors need to be taught

# TYPICAL CHALLENGING BEHAVIORS

## Mild

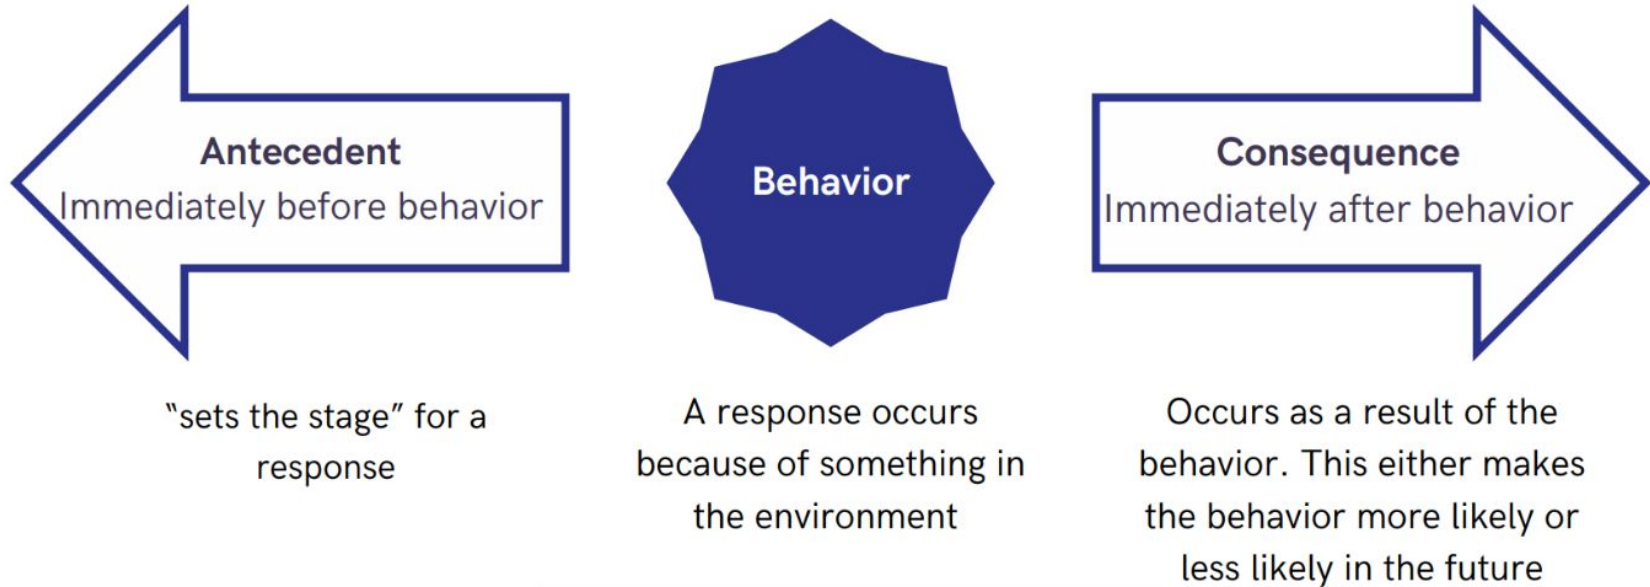

- Inattention
- Out of seat
- Disruptive Noises
- Non-compliance/refusal
- Food stealing
- Sleeping in class

## Moderate/Severe

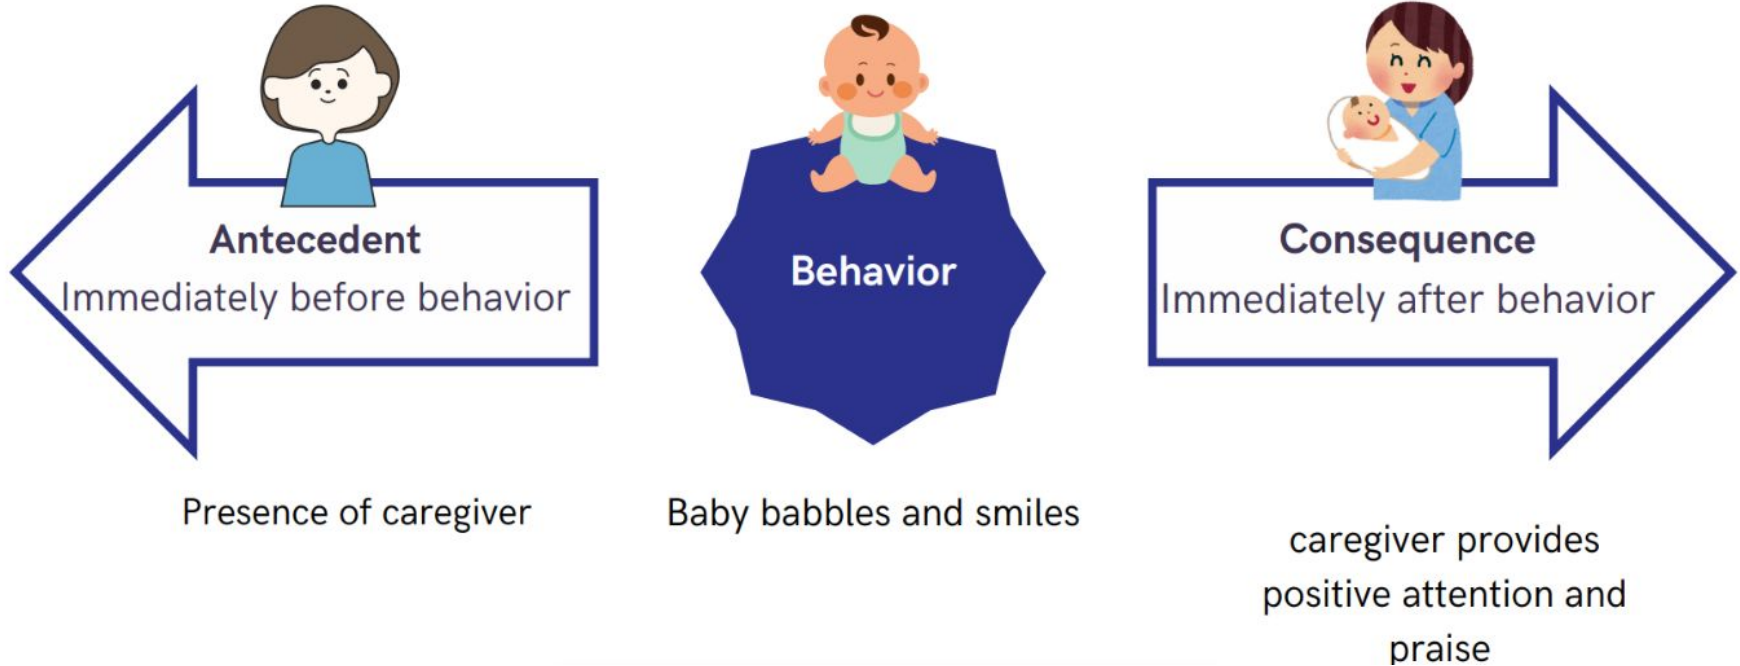

- Elopement
- Aggression
- Spitting
- Self-injurious behavior
- Property destruction
- Verbal threats
- Self-stimulation

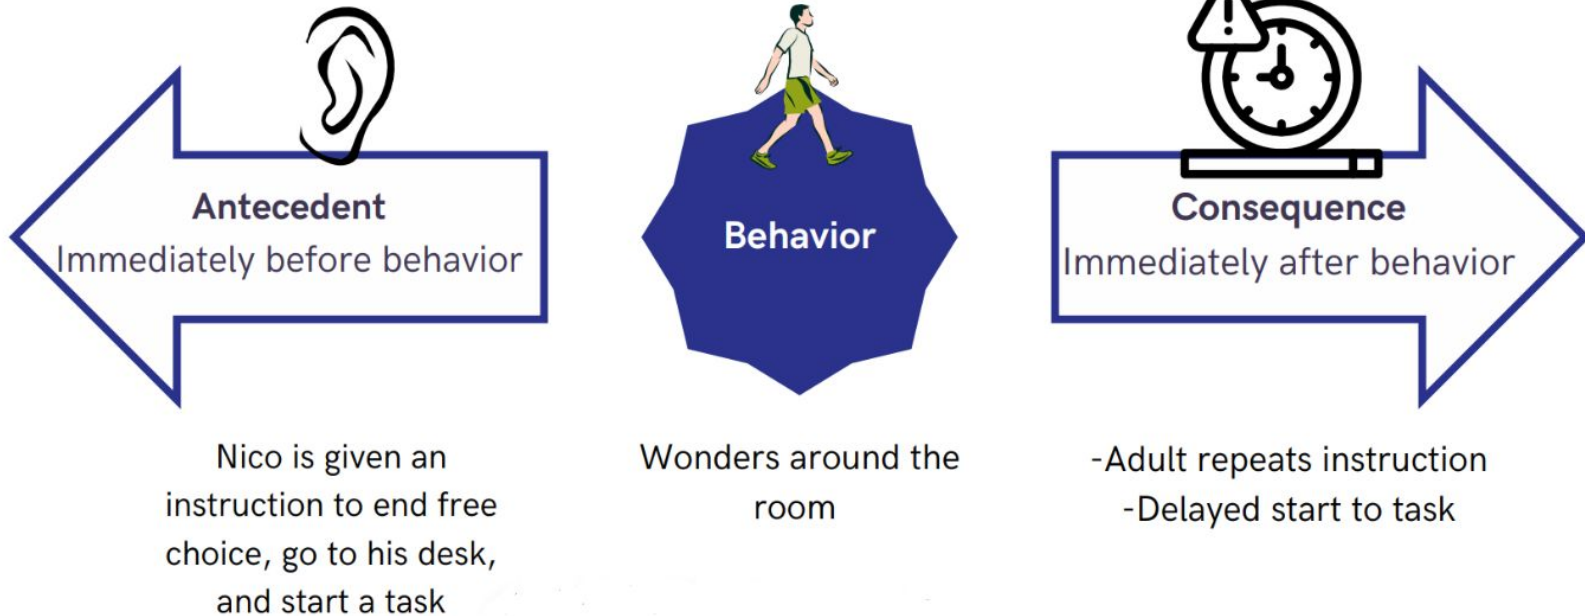

# BEHAVIOR IN CONTEXT: HOW BEHAVIOR IS LEARNED

# BEHAVIOR IN CONTEXT: HOW BEHAVIOR IS LEARNED

# BEHAVIOR IN CONTEXT: HOW BEHAVIOR IS LEARNED

# BEHAVIOR IN CONTEXT: HOW BEHAVIOR IS LEARNED

## Antecedent

Immediately before  
behavior

- People present
- Location
- Academic Materials
- Attention
- Activities & Tasks
- Restricted Access
- Instructions

## Behavior

Observable/  
Measureable

- What did it look like
- how intense
- how many times/how long

## Consequence

Immediately after  
behavior

- Restricted Access
- Access to preferred
- Attention
- Escape
- Praise
- Automatic

# WHY WE DO WHAT WE DO

Functional Categories	GET Something (Positive Reinforcement)	AVOID Something (Negative Reinforcement)
Internal	Relaxation Justice/Fairness Sensory Input Enjoyment	Failure Embarrassment Boredom Anxiety
External	Attention Objects Money Praise Preferred Activities	Tasks Sensory input Peers/Teacher Homework Chores

# FUNCTIONS OF A BEHAVIOR

**E**

To get out of or to  
delay something  
aversive

**A**

To connect with  
others around us

**T**

To access items  
and activities

**S**

Because it feels  
good

# FUNCTIONAL BEHAVIOR ASSESSMENTS

- A process of gathering and analyzing data to determine the function of a student's challenging behavior that is blocking the students access to an education or the education of others.
- FBAs are designed to provide information regarding the environmental conditions that maintain problem behavior.
- FBAs are rooted in the theory that behavior is functional (has a purpose, predictable, and changeable).

# THE BENEFITS OF FBAS

- Improved behavioral outcomes with hypothesis driven interventions
- Increased-appropriate, prosocial behaviors with reduced emphasis on punishment
- Increased likelihood of meaningful and lasting change
- Supports students in the least restrictive environment

# IDEA MANDATES

## Requirements for completion of FBA include:

---

- |           |   |           |  |
|-----------|---|-----------|--|
| <b>01</b> | Consideration when behavior impedes learning (student's own or others')                                     | <b>02</b> | Hold MDR when pattern of removals or 10+ days of removal |
| <b>03</b> | Complete FBA/BIP when conduct is a manifestation of disability (BIP to be adjusted if previously completed) | <b>04</b> | Considering change of placement                          |

*Note: Best practice often exceeds legal minimums*

# FBA/BIP BEST PRACTICE

- Supported by behavior scientific research and has been the “gold” standard for behavior intervention practices for years.
- Provides educators with deeper insights into the triggers of challenging behaviors and why the behaviors continue
- Facilitates personalized and effective BIPS
- Can be used proactively within MTSS/ PBIS framework rather than a separate process.

# **TYPES OF FBAS**

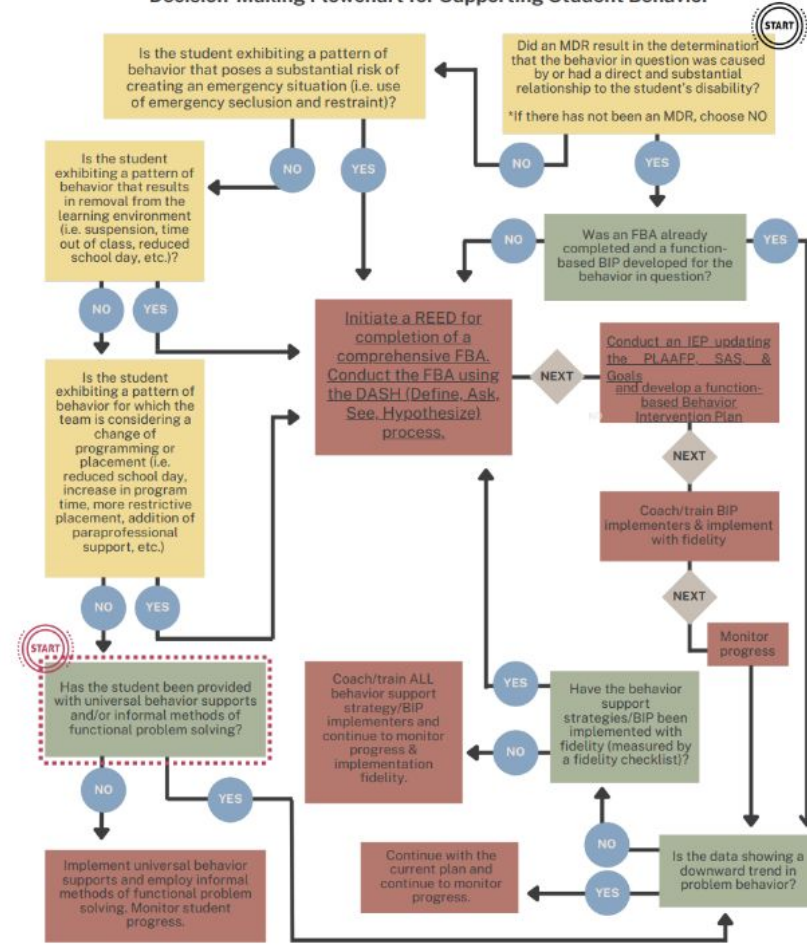

## **Brief Functional Behavior Assessment**

- Mild, somewhat disruptive behavior
- Number of prioritized behaviors are few (one or two)
- The pattern of occurrence is clear

## **Comprehensive (Full) Functional Behavior Assessment**

- Moderate/severe behaviors
- Disruptive enough to impact student success and the teacher's ability to instruct
- Multiple behaviors occurring in multiple environments

# FBA Decision Making Tree

# TEAMING STRATEGIES FBAS/BIPS

01

**Defining Behavior:** Classroom teachers and paraprofessionals provide insights on specific behaviors.

02

**Collecting Indirect Data:** Special education staff, parents, and school psychologists share background information, including medical, social, or historical factors.

03

**Conducting Observations:** Multiple team members observe in different settings to gather comprehensive data.

04

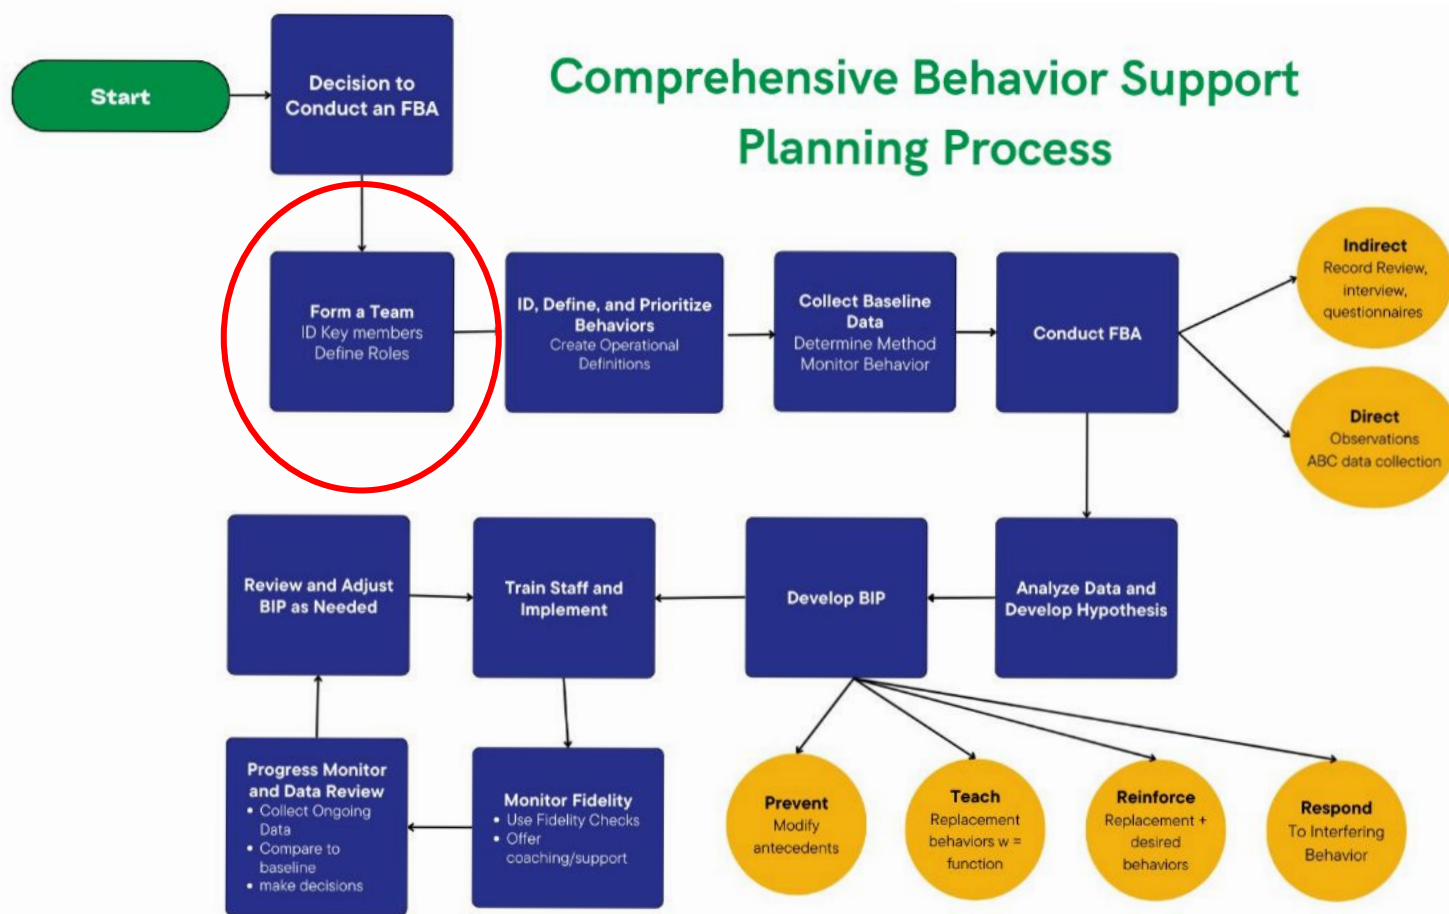

**Analyzing Data & Forming Hypotheses:** The team collaborates to review and interpret data, ensuring diverse perspectives.

05

**Developing the BIP:** Together, the team decides on proactive strategies, teaching plans, and reinforcement methods.

06

**Implementing & Monitoring:** Each member understands their role in implementation and data tracking.

# WHO SHOULD BE ON YOUR TEAM

- 01 Classroom Teacher: Knows the student's daily behavior and routines.
- 02 Special Education Staff: Offers expertise in behavior support and interventions.
- 03 Paraprofessionals: Observe and interact with the student throughout the day.
- 04 Parents/Guardians: Provide context from outside of school.
- 05 School Psychologist/Social Worker/BCBA: Knowledge in assessing and designing behavior plans.

# EFFECTIVE TEAMING STRATEGIES

## Strategies for Effective Collaboration

---

01

**Regular Team Meetings:**

Schedule consistent check-ins to discuss progress, challenges, and adjustments.

02

**Clear Roles & Responsibilities:**

Define who will be responsible for data collection, intervention implementation, and monitoring.

03

**Open Communication:** Ensure all team members feel heard and can share their observations and suggestions.

04

**Shared Documentation:** Use collaborative tools (like shared folders or forms) to track data and progress.

# **FBA TIMELINE CONSIDERATION**

## **1st week-plan meeting with the entire team**

- **Begin FBA interviews**
- **Design Data collection system**
- **File review**
- **Assign roles**

## **2-4th Weeks**

- **Continue data collection**
- **Conduct any additional interviews**
- **Direct observation by support staff**

## **5th-6th weeks-review with entire team**

- **Review, summarize & analyze data**
- **Generate summary statements/hypothesis/identify major variables**
- **Begin design intervention, BIP Development**

# FIVE PRIMARY OUTCOMES OF AN FBA

- 01 **Description of Interfering Behaviors:** Clear, specific, observable details about what the behavior looks like.
- 02 **Identification of Antecedents:** What events or triggers happen right before the behavior occurs?
- 03 **Identification of Setting Events:** Broader environmental factors (e.g., lack of sleep, changes in routine) that can influence behavior.
- 04 **Identification of Consequences:** What happens right after the behavior that may be reinforcing it?
- 05 **Development of Hypothesis Statements:** Informed guesses about why the behavior is occurring, based on data collected.

# THE FBA PROCESS: DASH APPROACH

**D: Describe** - Define the behavior in clear, observable terms.

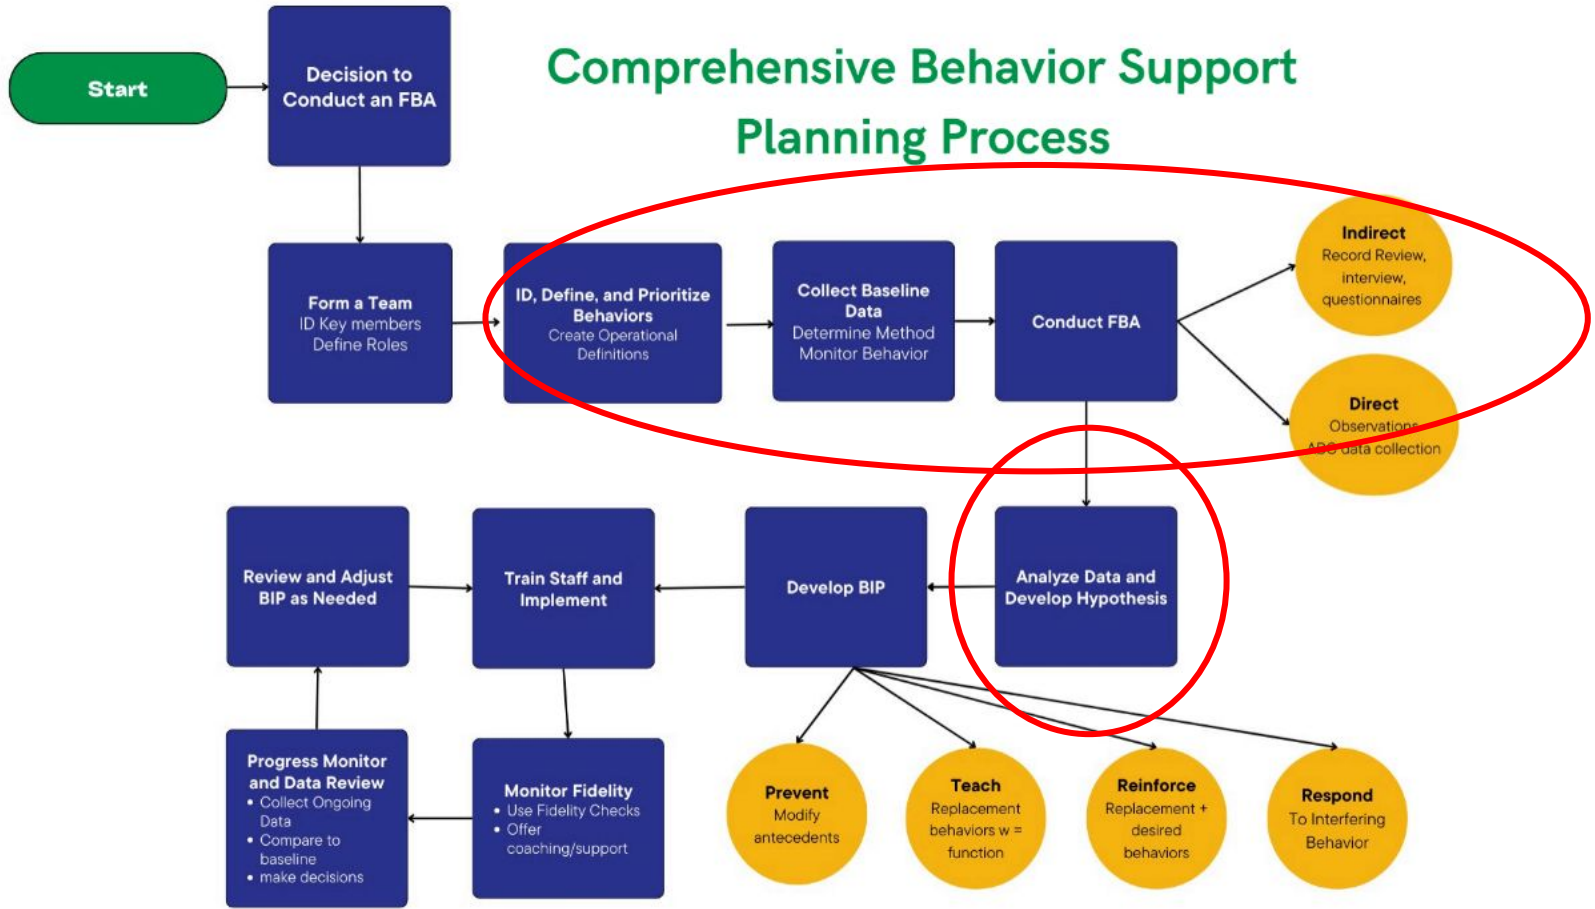

**A: Ask** - Gather information through interviews, surveys, and record reviews.

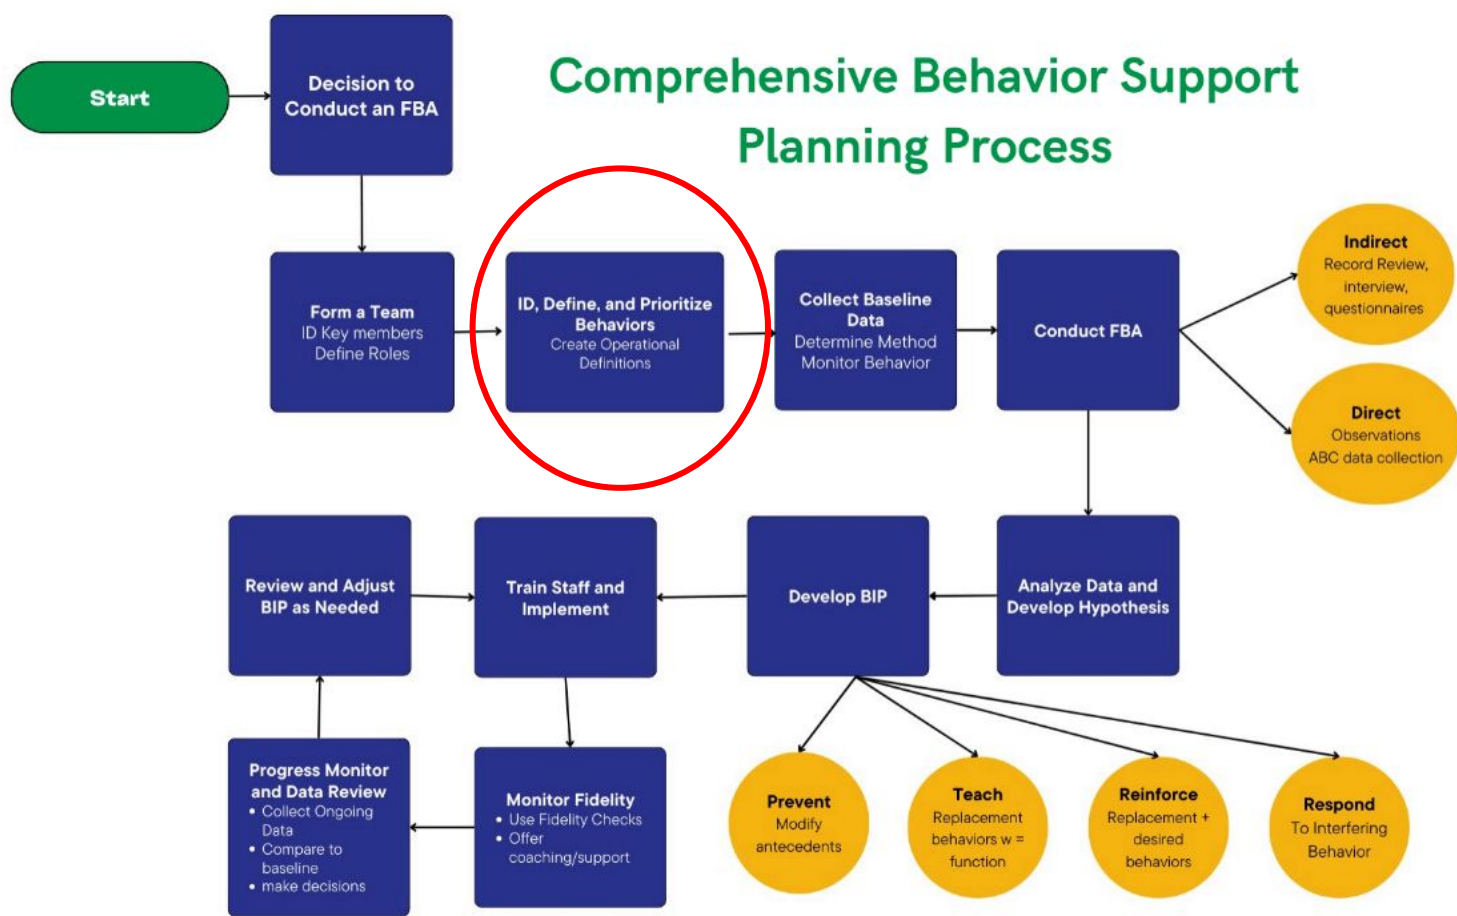

**S: See** - Observe the behavior directly in different contexts.

**H: Hypothesize** - Develop an informed guess about why the behavior is happening.

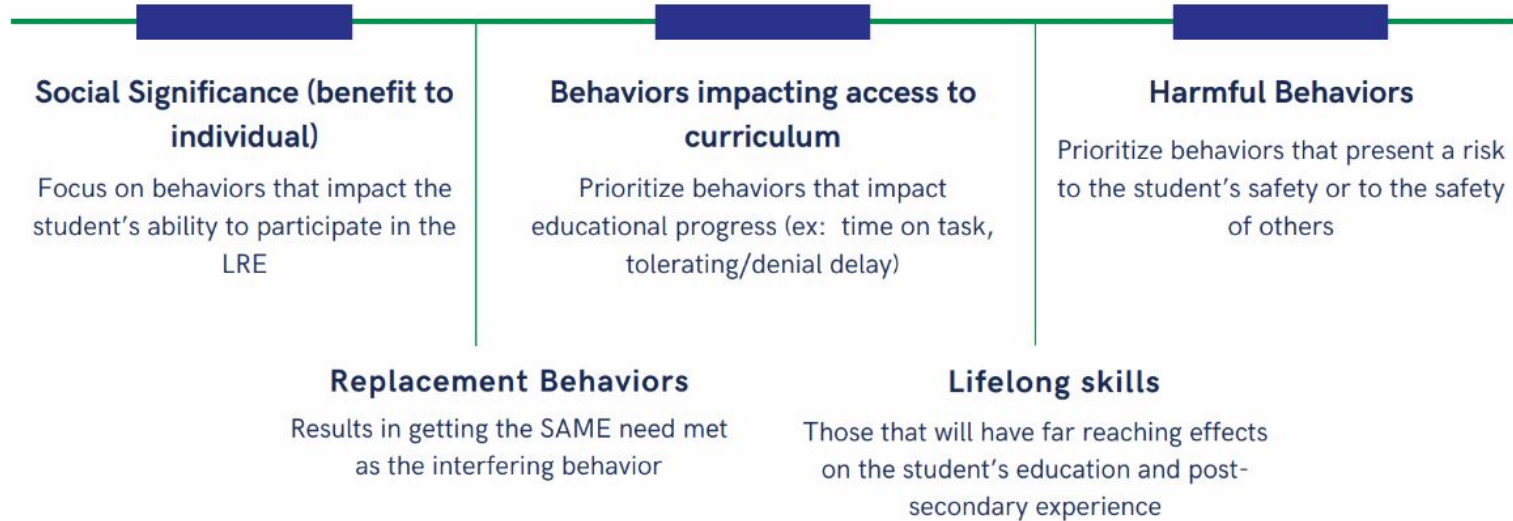

# SELECTING BEHAVIORS FOR INTERVENTION

Prioritize reducing behaviors that will greatly improve the student's experience, enhance the school environment for all, and potentially influence other behaviors positively.

# DEFINE/DESCRIBE THE BEHAVIOR

**Challenging behaviors are identified and operationally defined**

- **Observable**

The behavior is an action that can be seen or heard by two or more people

Ex. Jordan throws his food on the floor.

- **Measureable**

The behavior can be counted or timed

Ex. The number of times Jordan throws food on the floor can be counted

- **Passes the stranger test**

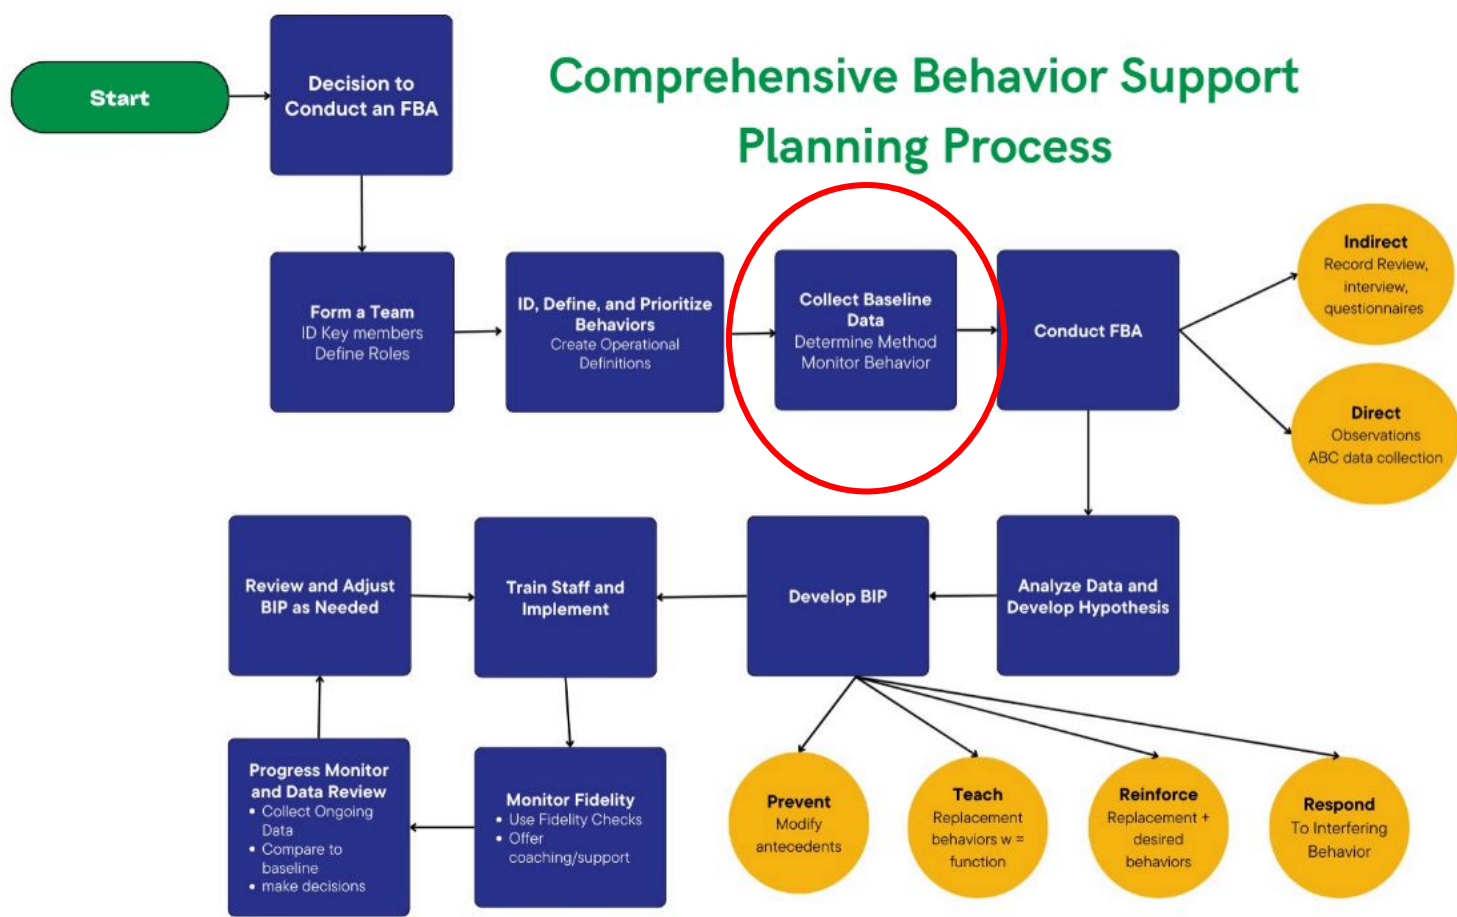

Defined clearly and completely so a stranger could read the operational definition and recognize when the behavior begins and when the behavior ends

We gave you a chance  
To water the plants.  
We didn't mean *that* way—  
Now zip up your pants.

## The Dangers of Unclear Definitions!!

Silverstein, S. (1978).

# METHODS OF PROGRESS MONITORING: DIRECT OBSERVATION

## Frequency

Counting how often a behavior occurs within a specified time frame

Example: Tracking how many times a student raises their hand in class.

## Duration

Measuring how long the behavior lasts from start to end.

Example: Recording the length of a tantrum episode.

## Latency

Time between a specific signal and the behavior's onset.

Example: Time it takes for a student to start a task after a teacher gives an instruction.

## Intensity

Level of severity or impact of the behavior (usually qualitative).

Example: Rating the intensity of a student's outburst on a scale from 1 to 5.

# DATA TO COLLECT: BEFORE AN FBA

# SELF MANAGEMENT & TOKEN ECONOMY

Date: \_\_\_\_\_

### Student's Schedule

Morning Rites: Your teachers know you can do it!	Did I turn in or need to turn in my homework?	Y or N	
	Check your study table	Y or N	
	Did I do my work?	Y or N	
Gym, Music, Art	Did I go follow directions?	Y or N	
	Did I participate in the activity?	Y or N	
Recess break: I need to only have 3-5 minutes.	Did I take 3-5 minutes?	Y or N	
Snack	Did I eat my snack?	Y or N	
Snack is a quiet time for math...not talking and disruptive (no 100% yet)	Did I check my table now for directions?	Y or N	
	Did I ask for help?	Y or N	
Writing	Did I check my table now for directions?	Y or N	
	Did I finish my work?	Y or N	
Learn and relax	Did I read my book?	Y or N	
	Did I make good choices?	Y or N	
Social Studies	Did I do my seat work for social studies?	Y or N	
	Turn in your work	Y or N	

### Self-Management Plan

I must complete this independently each hour. If I more than 1 each day to \_\_\_\_\_ after 4th hour I will earn one point. These points are added each week to earn a reward at school the following Monday. Daily rewards can be earned at home.

Today's Date:	Did I have all materials?	Did I need a pass to go to the bathroom?	Do my papers get all work?	Did I turn in my HW?	Did I write my HW in my planner?	Points Earned
1st hour - ELA	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	
2nd hour - ELA	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	
3rd hour - Social Studies	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input type="checkbox"/>

CICO Weekly Summary

You can put tabs on bottom to keep  
monthly/longitudinal data organized.

# DATA TO COLLECT: DURING AN FBA

# ASK: COLLECT INDIRECT DATA

**Indirect Data Sources:** Interviews with teachers, parents, and the student; review of disciplinary records; questionnaires and rating scales.

**Purpose:** Indirect data helps to gather context and background information that might not be evident through observation alone.

<h2 style="text-align: center;">FAST</h2> <p style="text-align: center;"><i>Functional Analysis Screening Tool</i></p>																
Client: _____ Date: _____ Informant: _____ Interviewer: _____																
<p><i>To the Interviewer:</i> The FAST identifies factors that may influence problem behaviors. Use it only for screening as part of a comprehensive functional analysis of the behavior. Administer the FAST to several individuals who interact with the client frequently. Then use the results to guide direct observation in several different situations to verify suspected behavioral functions and to identify other factors that may influence the problem behavior.</p> <p><i>To the Informant:</i> Complete the sections below. Then read each question carefully and answer it by circling "Yes" or "No." If you are uncertain about an answer, circle "N/A."</p>																
<p><b>Informant-Client Relationship:</b></p> 1. Indicate your relationship to the person: _____ Parent _____ Instructor Therapist/Residential Staff _____ (Other) 2. How long have you known the person? _____ Years _____ Months 3. Do you interact with the person daily? _____ Yes _____ No 4. In what situations do you usually interact with the person? _____ Music _____ Academic training _____ Leisure _____ Work or vocational training _____ (Other)																
<p><b>Problem Behavior Information</b></p> 1. Problem behavior (check and describe): _____ Aggression _____ Self-harm _____ Stereotypy _____ Property destruction _____ Other _____ 2. Frequency: _____ Hourly _____ Daily _____ Weekly _____ Less often 3. Severity: _____ Mild Disruptive but little risk to property or health _____ Moderate Property damage or minor injury _____ Severe Significant threat to health or safety 4. Situations in which the problem behavior is most likely to occur: Days/Times: _____ Settings/Activities: _____ Persons present: _____ 5. Situations in which the problem behavior is <u>least</u> likely to occur: Days/Times: _____ Settings/Activities: _____ Persons present: _____ 6. What is usually happening to the person right before the problem behavior occurs? _____ 7. What usually happens to the person right after the problem behavior occurs? _____ 8. Current treatments: _____ _____ _____																
<ol style="list-style-type: none"> <li>Does the problem behavior occur when the person is not receiving attention or when caregivers are paying attention to someone else?</li> <li>Does the problem behavior occur when the person requests for preferred items or activities are denied or when these are taken away?</li> <li>When the problem behavior occurs, do caregivers usually try to calm the person down or involve the person in preferred activities?</li> <li>Is the person usually well behaved when (s)he is getting lots of attention or when preferred activities are freely available?</li> <li>Does the person usually find or resist when (s)he is asked to perform a task or to participate in activities?</li> <li>Does the problem behavior occur when the person is asked to perform a task or to participate in activities?</li> <li>If the problem behavior occurs while tasks are being presented, is the person usually given a "break" from tasks?</li> <li>Is the person usually well behaved when (s)he is not required to do anything?</li> <li>Does the problem behavior occur even when no one is nearby or watching?</li> <li>Does the person engage in the problem behavior even when leisure activities are available?</li> <li>Does the problem behavior appear to be a form of "self-stimulation"?</li> <li>Is the problem behavior <u>less</u> likely to occur when sensory stimulating activities are presented?</li> <li>Is the problem behavior cyclical, occurring for several days and then stopping?</li> <li>Does the person have recurring painful conditions such as ear infections or allergies? If so, list: _____</li> <li>Is the problem behavior <u>more</u> likely to occur when the person is ill?</li> <li>If the person is experiencing physical problems, and these are treated, does the problem behavior usually go away?</li> </ol>

# INDIRECT DATA: RECORD REVIEW

Information	What to look for	Why/ Relevance to FBA
<b>Social History</b>	Changes in address/schools, residential placements, parents separated, etc	Potential trauma or stressors that impact behavior
<b>Medical history</b>	Developmental delays, vision/hearing, motor impairments, medications, health issues	Can suggest skill delays, setting events that impact occurrence of impeding behavior
<b>Attendance history</b>	Frequent absences	Skill deficits related to inconsistent instruction, provides clues to setting events
<b>Disciplinary history</b>	Referrals, suspensions, occurrences of S&R	info on severity, antecedents and consequence, and effectiveness of procedures
<b>Academic History</b>	Previous and current scores on assessments	Highlight academic areas that may be challenging and impact behavior
<b>Evaluative reports</b>	Prior FBAs, psychoeducational, academic, speech, ABA, OT, etc.	Info on relevant characteristics, strengths and needs,
<b>IEPs</b>	Services, supports, accommodations, progress on goals	Info on skill deficits, degree to which behaviors are addressed in school

# INDIRECT DATA: INTERVIEW

Adapted from: O'Neill, R.E., Horner, R. H., Albin, R. W., Sprague, J. R., Storey, K., & Newton, J. S. (1997). Functional Assessment and Program Development for Problem Behavior. Pacific Grove, CA: Brooks/Cole Publishing.

## FUNCTIONAL ASSESSMENT INTERVIEW FORM - YOUNG CHILD

Child with Problem Behavior(s): \_\_\_\_\_ Date of Interview: \_\_\_\_\_

Age: \_\_\_\_\_ Yrs \_\_\_\_\_ Mos Sex: *M* *F*

Interviewer: \_\_\_\_\_ Respondent(s): \_\_\_\_\_

### A. DESCRIBE THE BEHAVIOR(S)

1. What are the behaviors of concern? For each, define how it is performed, how often it occurs per day, week, or month, how long it lasts when it occurs, and the intensity in which it occurs (low, medium, high).

	Behavior	How is it performed?	How often?	How long?	Intensity?
1.					
2.					
3.					
4.					
5.					
6.					

2. Which of the behaviors described above occur together (e.g., occur at the same time; occur in a predictable "chain"; occur in response to the same situation)?

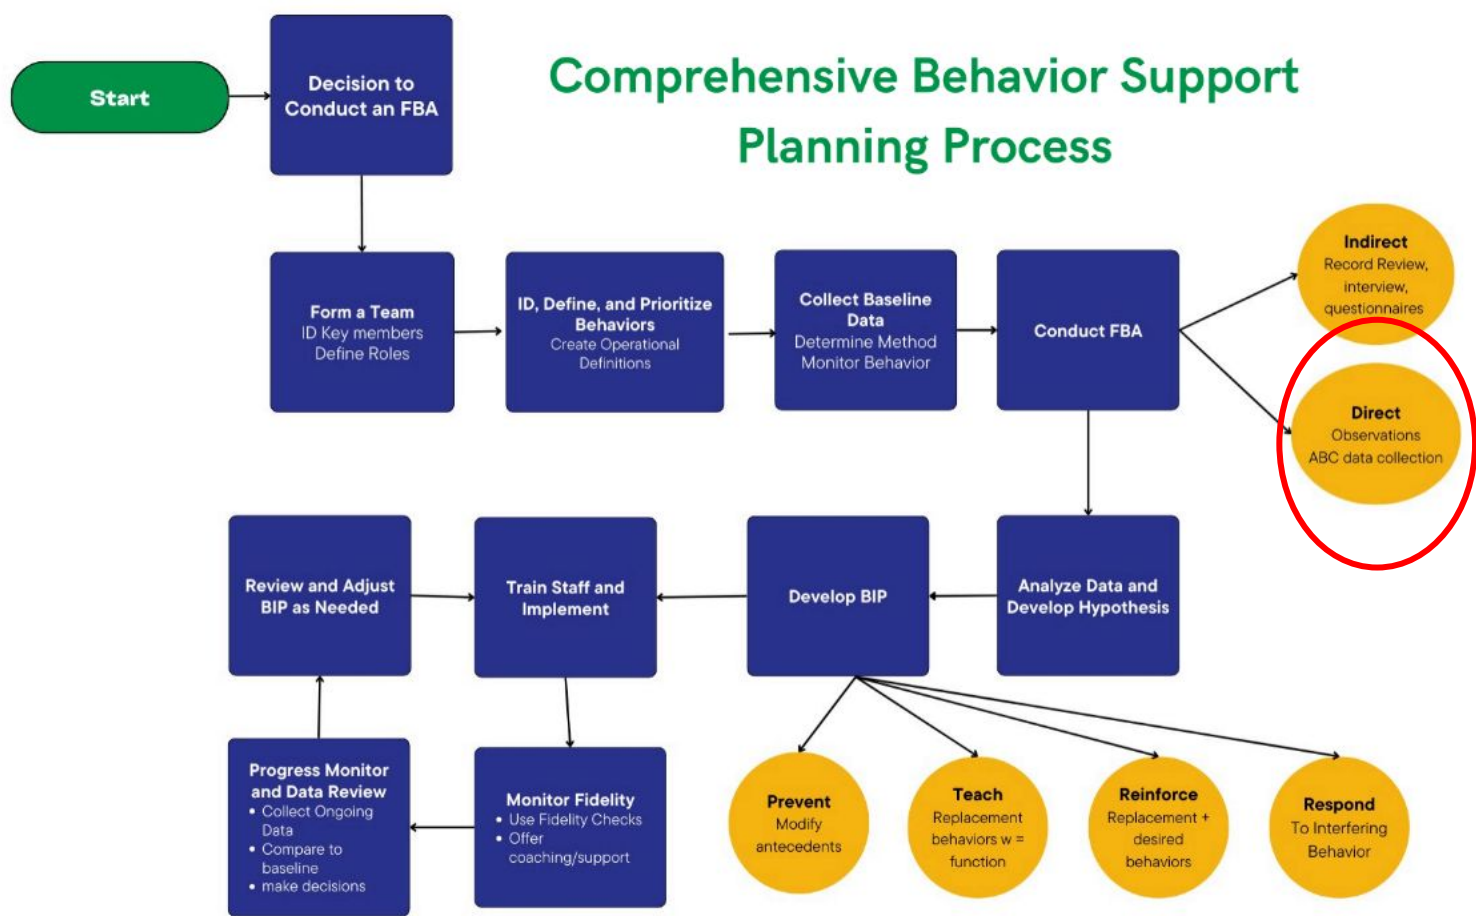

### B. DEFINE POTENTIAL ECOLOGICAL EVENTS THAT MAY AFFECT THE BEHAVIOR(S)

1. What medications does the child take, and how do you believe these may affect his/her behavior?
2. What *medical complication* (if any) does the child experience that may affect his/her behavior (e.g., asthma, allergies, rashes, sinus infections, seizures)?
3. Describe the *sleep* cycles of the child and the extent to which these cycles may affect his/her behavior.
4. Describe the *eating routines and diet* of the child and the extent to which these routines may affect his/her behavior.

# THE ICEBERG OF BEHAVIOR

- Visible behavior is just the tip of the iceberg
- Many factors below the surface influence what we see
- Examples: biological, emotional, cognitive, and skill-related factors, learning history, cultural considerations

# SEE: DIRECT DATA

## Observe in Real Time:

- Scatterplot data to see routines/times when behavior occurs
- ABC (Antecedent-Behavior-Consequence) data to see how behavior unfolds in different situations
- Measurement to see how often, how long, or how intense

**Focus:** Look for patterns. What typically happens before and after the behavior? Are there specific times, settings, or activities where the behavior is more likely?

# ABC DATA COLLECTION

## Importance of observing:

- Tells us the conditions under which behavior occurs
- Allows us to hypothesize the function
- Tells us what we can change about the environment
- Confirms/refutes results of indirect assessments

ABC (Antecedent, Behavior, Consequence) Chart Form

Date/Time	Activity	Antecedent	Behavior	Consequence
Date/Time when the behavior occurred	What activity was going on when the behavior occurred	What happened right before the behavior that may have triggered the behavior	What the behavior looked like	What happened after the behavior, or as a result of the behavior

2:45				
3:00				

**Please Note:** Use the follow as a key for the type of behavior Student demonstrates in the school setting if he earns a ⊕:  
R - Refusal 1 - Insubordinate D - Disruptive D - disrespectful

## According to Student's Behavior Plan:

- He will be given two prompts to comply with directives
- After 3 prompts he will need to leave the room and given 15 minutes to regroup (if S/AS Teacher should be called). If Student complies within the 15 minutes of regrouping time, he will return to class and begin working on his assignment
- Student will not be given a ⊕ for the initial 15 minute regrouping time (please note this time was used for regrouping in the chart above).
- Any time after the initial 15 minutes of regrouping time, Student will earn ⊕ for not complying

## Classroom Attention Observation Form

Student Name: \_\_\_\_\_ Date: \_\_\_\_\_  
 Observer: \_\_\_\_\_ Location: \_\_\_\_\_ Start Time: \_\_\_\_\_ End Time: \_\_\_\_\_  
 Description of Activities: \_\_\_\_\_

Directions: Observe the student at a time when the student is engaged in independent seatwork or attending to large-group instruction. On-Task Behavior is the only behavior being recorded. It is coded using a momentary time-sampling procedure. At the start of each 15-second interval, glance at the target child for approximately two seconds and determine if the child is on-task or off-task during the brief observation. If the child is found to be on-task (attending to large-group instruction or doing his or her assigned seatwork), mark the interval with an "X". If the child is off-task, leave the circle unmarked. Then keep running notes of any student behaviors or classroom events until the onset of the next time interval. When the observation is finished, use Table 1 below to calculate the student's time on task (engaged academic time).

	1	2	3	4	5
	0:00 0:15 0:30 0:45	1:00 1:15 1:30 1:45	2:00 2:15 2:30 2:45	3:00 3:15 3:30 3:45	4:00 4:15 4:30 4:45
ON-TASK					
	6	7	8	9	10
	5:00 5:15 5:30 5:45	6:00 6:15 6:30 6:45	7:00 7:15 7:30 7:45	8:00 8:15 8:30 8:45	9:00 9:15 9:30 9:45
ON-TASK					
	11	12	13	14	15
	10:00 10:15 10:30 10:45	11:00 11:15 11:30 11:45	12:00 12:15 12:30 12:45	13:00 13:15 13:30 13:45	14:00 14:15 14:30 14:45
ON-TASK					

Table 1. Calculate the Rate of On-Task Behavior During the Observation Period

Type of Behavior	Number of intervals in which the On-Task behavior was observed	The 15% number of intervals in the observation periods	Rate (in decimal form) that the On-Task behavior occurred during the observation	Rate (in percentage form) that the On-Task behavior occurred during the observation
ON-TASK	Divided by	Equals	Times 100 =	%

Describe any notable student behaviors or other classroom events observed during the session:

# DURATIONAL DATA TRACKING

Durational data via sheet below or with scatterplot by connecting target behaviors together, or by setting multiple target behaviors sorted by duration range.

## EXAMPLE

Behavior: Working individually

Behavior Definition (in specific, observable, measurable terms): Sitting at desk, with an assignment on the desk, looking at assignment, not talking to peers. Once student looks up (not looking at assignment any more), the behavior has stopped. If student begins talking to peers while looking at assignment, behavior has stopped.

Date	Time	Enter time when the behavior began	Enter time when the behavior stopped	Length of time that the behavior lasted for
11/5	9:30-10:30 AM	9:55 AM	10:06 AM	11 minutes
11/5	9:30-10:30 AM	10:19 AM	10:28 AM	9 minutes
11/6	9:30-10:30 AM	9:43 AM	9:51 AM	8 minutes
11/7	9:30-10:30 AM	10:04 AM	10:19 AM	15 minutes
11/7	9:30-10:30 AM	10:13 AM	10:23 AM	10 minutes

# INTENSITY DATA TRACKING

Track intensity by putting a corresponding intensity level number on a scatterplot or by separating target behavior by intensity. Pairing this with a response script is an easy and quick way to write your behavior plan.

## Suggested Interventions & Supports:

Intensity Levels	Suggested Adult Response
<b>Intensity Level 0</b> <i>Physically calm, cooperating with activities, attentive to staff, happy noises</i>	Engage in activity and routine. Encourage involvement with peers and staff.
<b>Intensity Level 1</b> <i>Pulling away from interaction but easily redirected, happy noises with some agitation at times, may have some <u>low intensity</u> digging/picking behaviors</i>	Give praise, calm voice. Encourage continued interaction. Attempt to physically redirect digging/picking behaviors or give a replacement item.
<b>Intensity Level 2</b> <i>Grabbing at staff, resisting interactions with whole body, noises mostly agitated and loud, digging/picking behaviors are <u>more intense or frequent</u></i>	Cease interaction while grabbing. Attempt to help him calm by using redirection, clapping, or a soft voice. May need a quiet area. Try interaction again once displaying calm behaviors.
<b>Intensity Level 3</b> <i><u>Repeated</u> self-injury or aggression/grabbing of staff, loud agitated noises that are repeated and/or sustained, intense and frequent digging/picking behaviors <u>causing bleeding or other health concerns</u></i>	Cease interaction while grabbing or being aggressive. Attempt to help him calm by using music, book on tape, redirection, or a soft voice. He will need to go to a quiet area until displaying calm behaviors. Nurse will need to be notified to help with wound care/documentation. Group home should be notified in writing or by phone.
<b>Level X</b> <i>Sleeping and not able to be awakened. Attempt to awake every 15 minutes.</i>	Attempt to awake every 15-minutes with loud noise and interaction. If he awakes, engage in activity and routine.

“Intensity levels” are descriptions of physical behaviors that may exist during the school day. Some or all behaviors may exist at each level.

# VISUALLY REPRESENT DATA

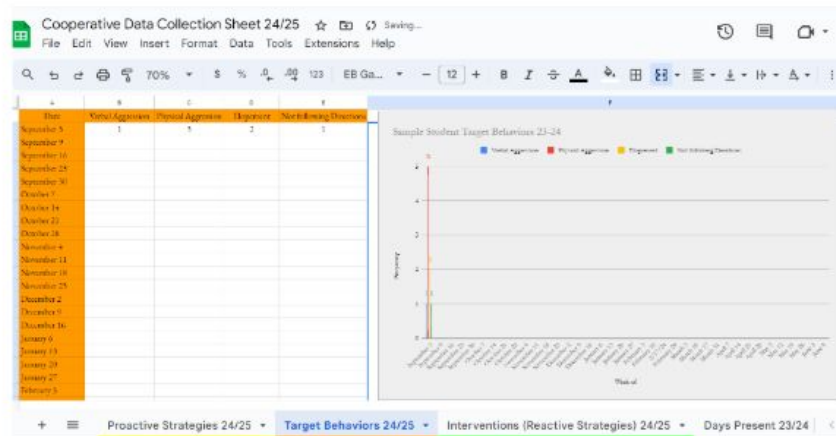

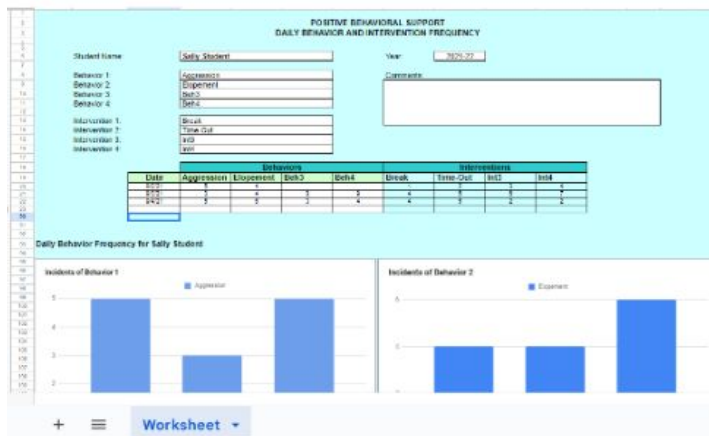

# DATA TO COLLECT: PROGRESS MONITORING

# TOOLS FOR CHARTING/GRAPHING DATA

# FIDELITY CHECKS FOR INTERVENTION

## Using a Visual Support Fidelity Checklist

Date: 1/24/22	Location: Classroom	Materials: Visual supports		
Steps		✓ 1	✓ 2	✓ 3
1.	Gain student's attention		✓	✓
2.	Direct student's attention to the visual cue	✓	✓	✓
3.	Point to the visual and verbally state the expected behavior	✓	✓	✓
4.	Prompt the student to demonstrate the behavior with a verbal and gestural prompt (e.g., "show me" or "you do it")			✓
5.	Give up to 5 seconds of wait time for the student to respond to the request			✓
6.	Use behavior specific praise and "describe other reinforcer here" if correct response to request, or  If the student does not respond to the request, use least to most prompting until the student follows the request		✓	✓
7.	Adult's verbal and non-verbal behavior is calm and supportive in all steps	✓	✓	✓
Performance Criteria: 7/7 steps in 2 consecutive attempts		3/7	5/8	7/8

# QUESTIONS TO ASK ALONG THE WAY

- Why am I collecting this data? How is it going to be used?
- What questions do I hope to answer with it?
- Is the way I am collecting the data going to help me answer that question?
- Is the data meaningful?
- Who will analyze it? How often?
- How/where/when is this being presented and to what audience?
- Are those responsible for collecting it going to be able to do so with relative ease?
- Do those responsible for collecting data understand how to record the information we need?
- Do they understand the reason why the information is important?
- Am I presenting the results in a way that the audience can understand in a meaningful way?

# HYPOTHESIZE: ANALYZE DATA & FORM

## HYPOTHESIS

### Combine Data Sources:

Use information from both indirect and direct data to develop a hypothesis.

### Form Hypothesis Statements:

Explain why the behavior occurs (e.g., "The student leaves his seat because he delays starting tasks").

### Use the Hypothesis to Guide Intervention Planning:

The more accurate the hypothesis, the more effective the intervention.

# HYPOTHESIS STATEMENT STRUCTURE

Routine (Where)			
Setting Event	Antecedent:  When:	Behavior:  Student does:	Consequence  Because:  Therefore the function of the behavior is to get/avoid:

# HYPOTHESIS STATEMENT STRUCTURE

# BEHAVIOR INTERVENTION PLANNING

- **Function-Based Intervention Plans are designed to address the purpose the behavior serves.**
- **The BIPs will provide students with the skills and training to obtain their needs through appropriate behaviors.**
- **How do we ensure that the intervention plan designed is serving the same function as the challenging behaviors?**

# **COLLABORATION ON BIP DEVELOPMENT**

## **Data Analysis**

- Team members share their findings from observations, interviews, and other data sources. Discuss patterns and discrepancies.

## **Consensus on Hypotheses:**

- Agree on the likely function(s) of behavior based on collected evidence.

## **BIP Planning:**

- Collaborating decide on proactive strategies, teaching approaches, and reinforcement plans, ensuring they are realistic and aligned with the needs of the student.

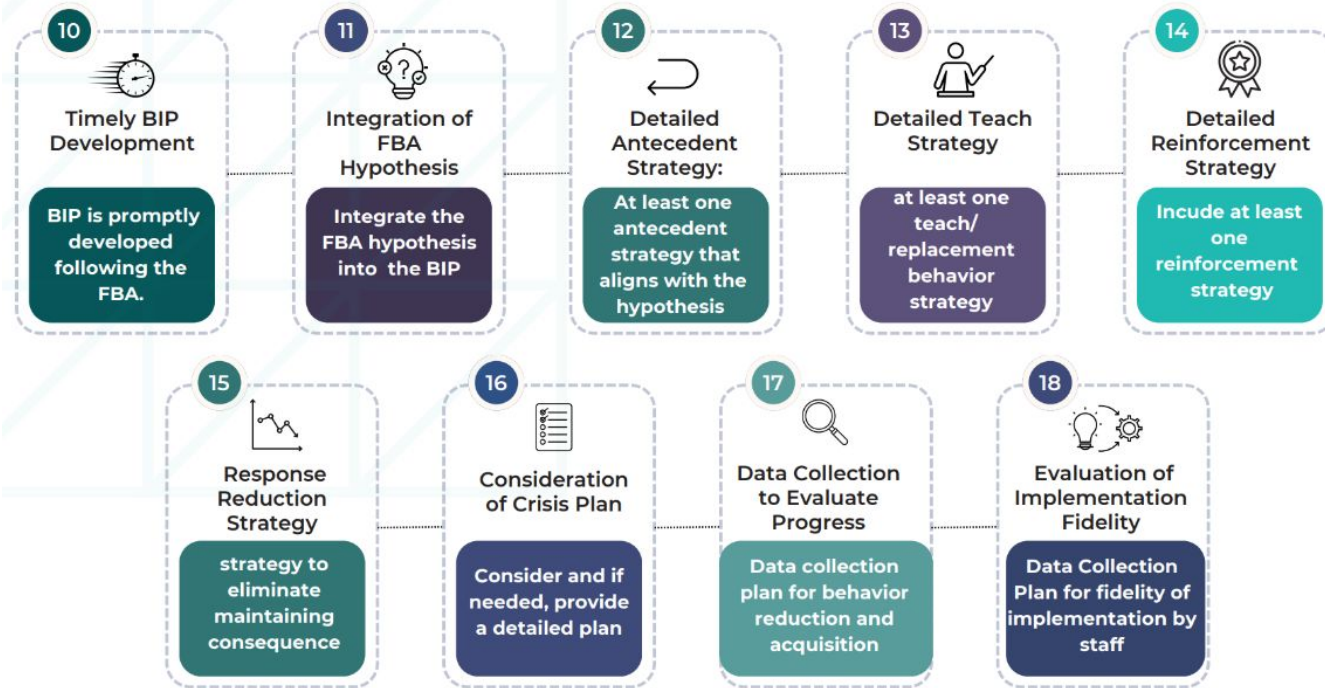

# TEAMWORK IN IMPLEMENTATION & MONITORING

- Assign roles for each part of the BIP (implementing strategies, collecting data, and tracking progress).
- Schedule regular check-ins to discuss what's working, what's not, and necessary adjustments.
- Use the team to ensure strategies are implemented with fidelity.

# BEHAVIOR INTERVENTION PLANNING

**Technical Adequacy Tool for Evaluation (TATE):** A tool developed to measure the technical adequacy (quality) of completed FBAs and BIPs.

# TECHNICAL ADEQUACY TOOL

## FBA and BIP Technical Adequacy Tool for Evaluation (TATE): Scoring Form

Iovannone, Christiansen, & Kincaid (Revised August 2015)

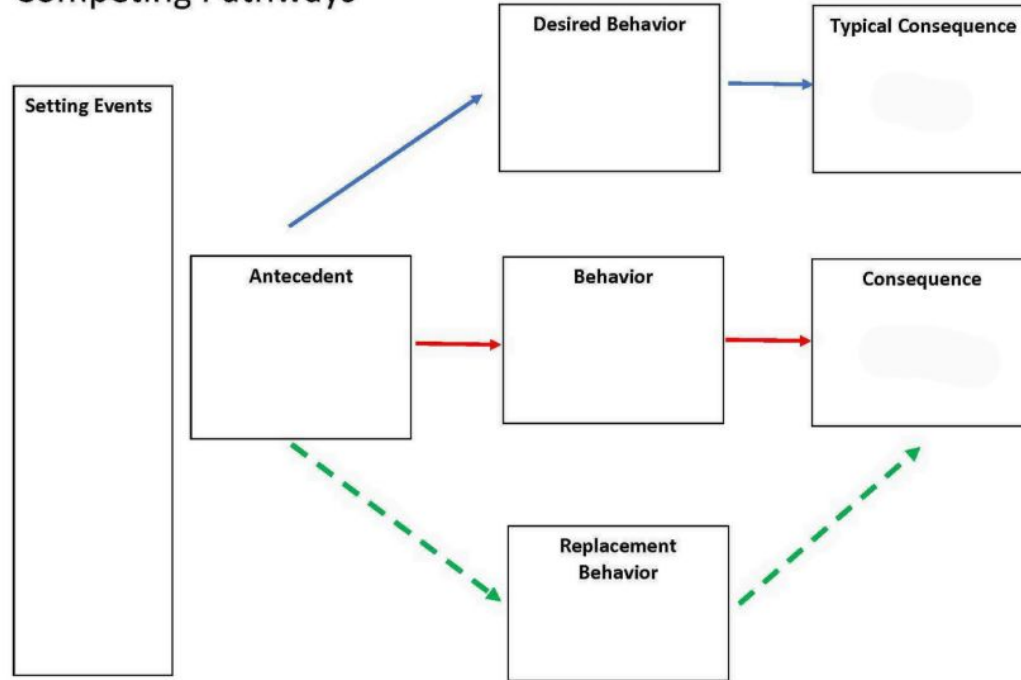

# TECHNICAL ADEQUACY TOOL

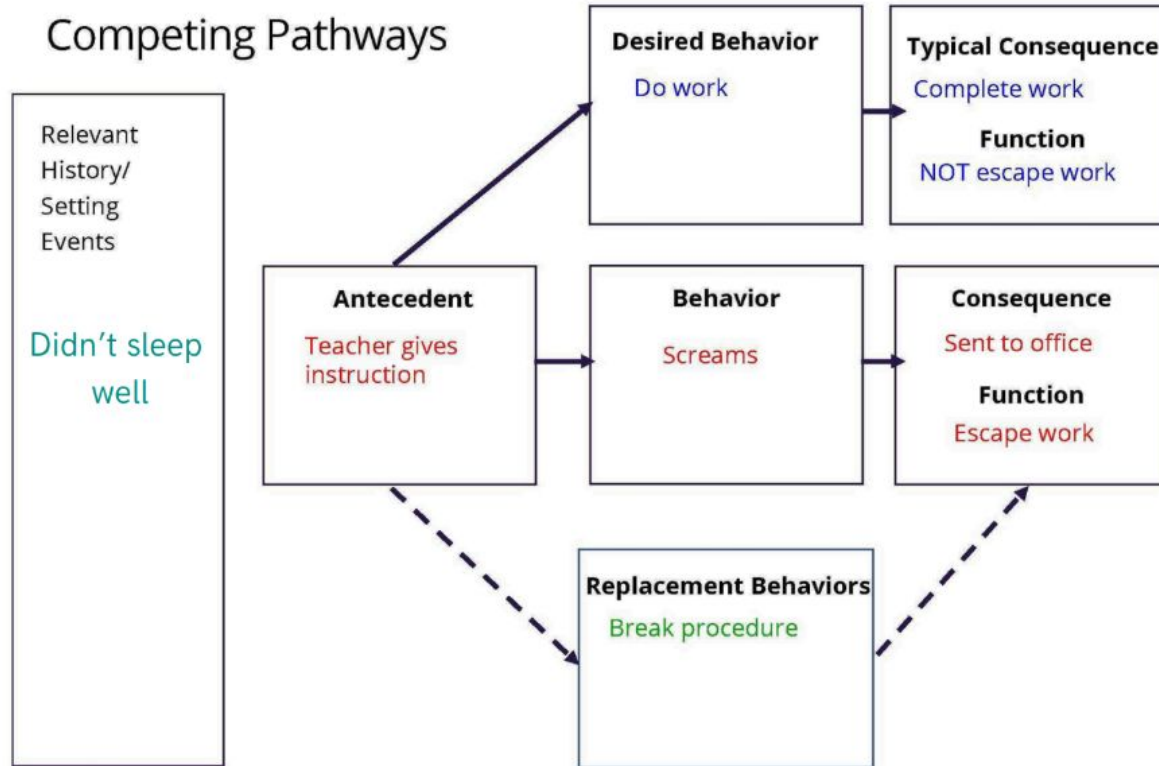

Component	Item	Scoring Guide	Score						
	<p>6. Antecedent events in which problem behavior is least likely to occur (or appropriate behavior is more likely to occur) are identified and specified. List antecedents: _____</p>	<p>0 = none, OR not antecedents 1 = identified, lacks detail 2 = identified AND detailed</p>							
	<p>7. Consequences (i.e., how others respond immediately after problem behavior occurs) are identified. List consequence(s): _____</p>	<p>0 = none, OR not consequences 1 = identified, lacks detail 2 = identified AND detailed</p>							
	<p>8. An identifiable hypothesis or summary statement that includes three essential components (i.e., antecedent events, behavior, function) is present and linked to the antecedent events and consequences listed in the FBA. Check each component present in the hypothesis and the presence of its link to the FBA data</p> <table border="0"> <tr> <td><input type="checkbox"/> Antecedent events</td> <td><input type="checkbox"/> Description of problem behavior</td> <td><input type="checkbox"/> Function of behavior</td> </tr> <tr> <td>Link: Yes/No</td> <td>Link: Yes/No</td> <td>Link: Yes/No</td> </tr> </table>	<input type="checkbox"/> Antecedent events	<input type="checkbox"/> Description of problem behavior	<input type="checkbox"/> Function of behavior	Link: Yes/No	Link: Yes/No	Link: Yes/No	<p>0 = no identifiable hypothesis, OR only one component or no (zero) components linked to FBA data 1 = identifiable hypothesis with 2 components linked to FBA data. 2 = includes all 3 components AND all 3 components are linked</p>	
<input type="checkbox"/> Antecedent events	<input type="checkbox"/> Description of problem behavior	<input type="checkbox"/> Function of behavior							
Link: Yes/No	Link: Yes/No	Link: Yes/No							
	<p>9. Function of behavior is one identified in research literature, provides specificity, and is linked to FBA data.</p> <p><input type="checkbox"/> Positive reinforcement—To get/obtain (attention, tangible, sensory stimulation) _____</p> <p><input type="checkbox"/> Negative reinforcement—To escape/avoid/delay (tasks, attention, tangibles; painful/uncomfortable stimuli) _____</p> <p><input type="checkbox"/> Multiple functions (positive and negative reinforcement) _____</p>	<p>0 = no function identified, OR no hypothesis, OR function not in research literature 1 = function identified in research literature, not linked to FBA data. 2 = function identified in research literature, AND linked</p>							
FUNCTIONAL BEHAVIOR ASSESSMENT SCORE			/18						

# BEHAVIOR INTERVENTION PLANNING

## Competing Pathways

# BEHAVIOR INTERVENTION PLANNING

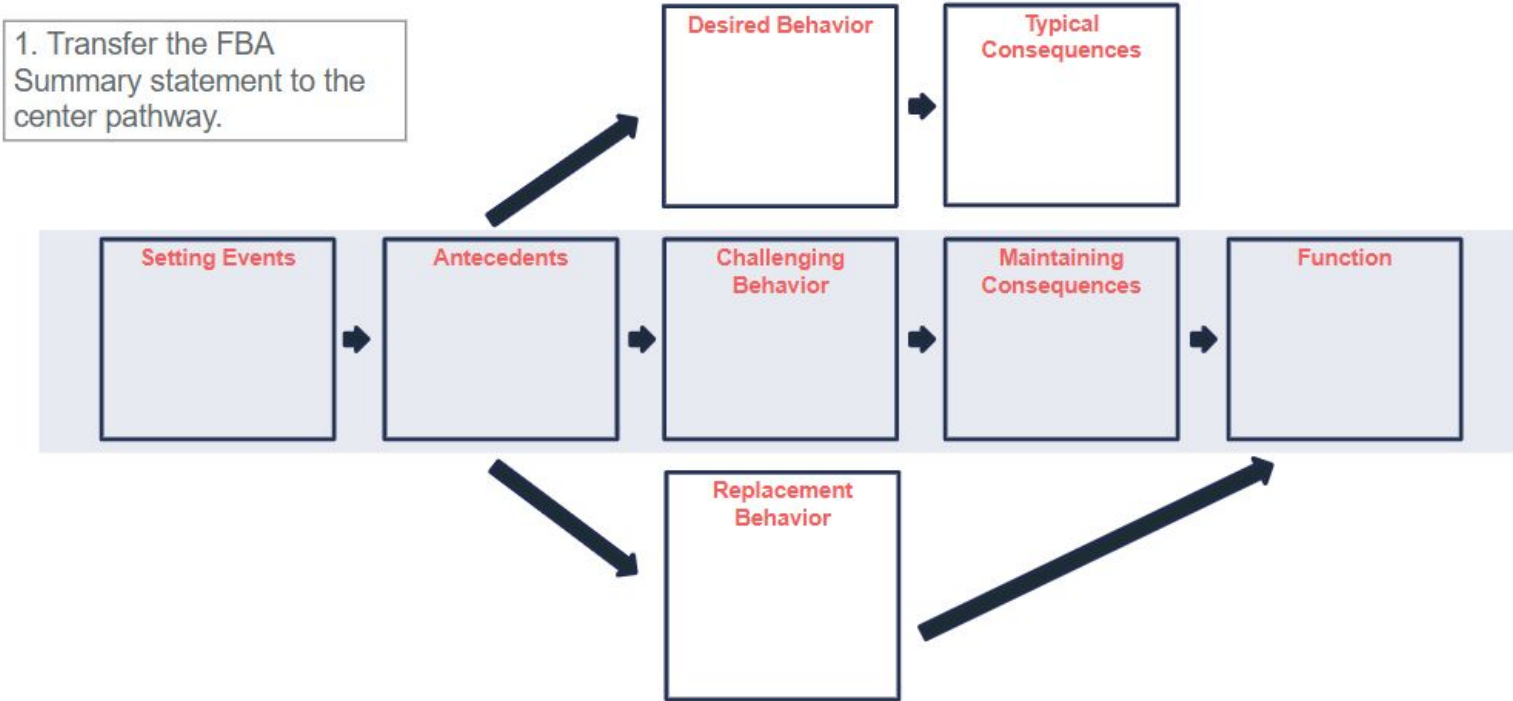

# WHY DO WE USE COMPETING PATHWAYS?

- Provides a sequential problem solving format for the team.
- Provides clarity in understanding why the behavior is occurring.
- Ensures the preventative strategies, replacement behavior and response strategies correlate to the student's current antecedents, behavior and consequences.

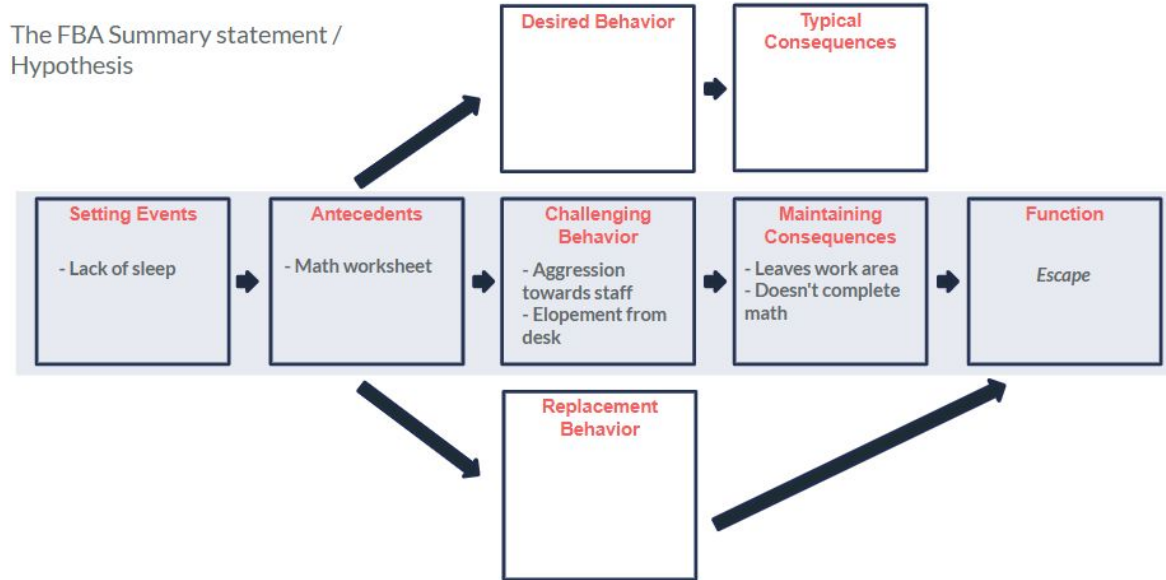

# COMPETING BEHAVIOR PATHWAY

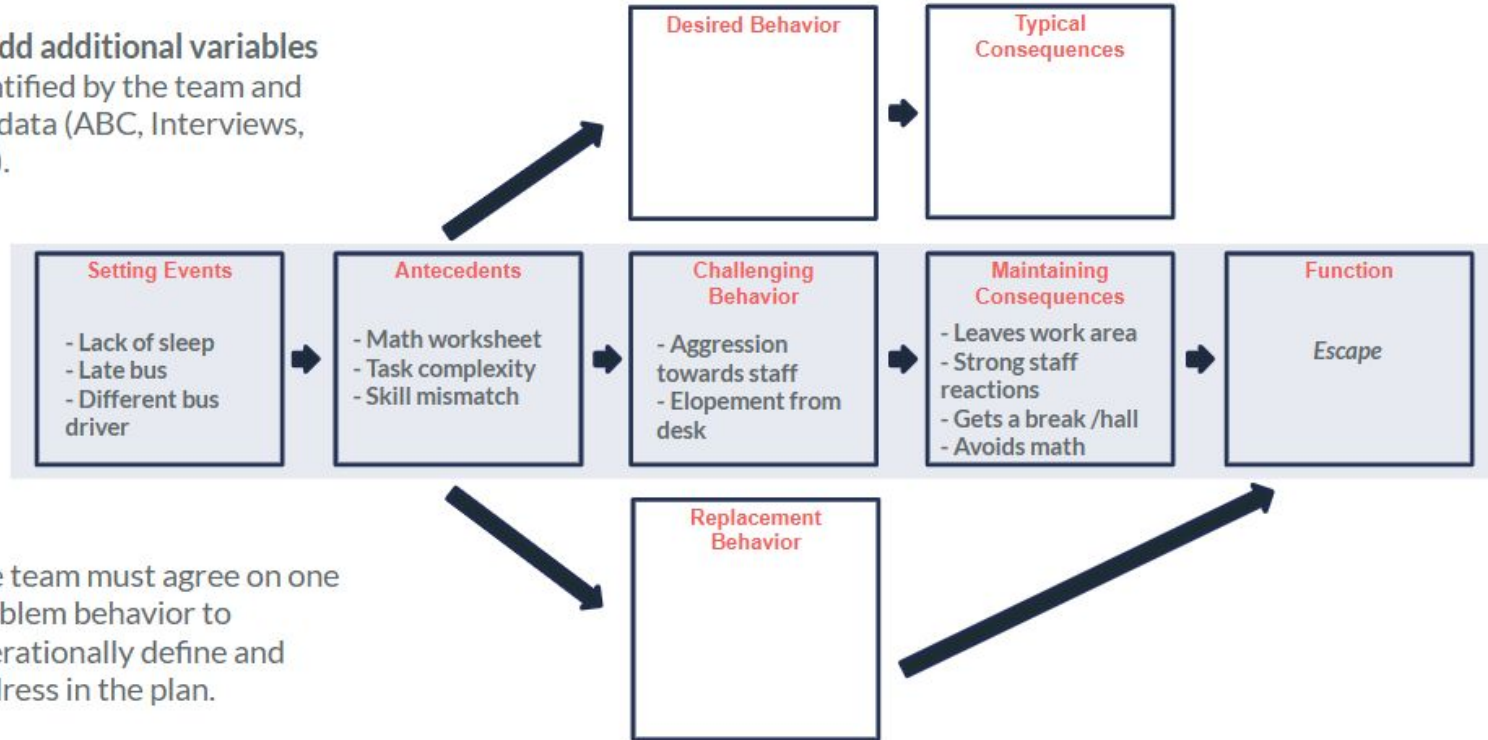

# FBA SUMMARY/HYPOTHESIS

“When Jordan has had little sleep and is presented with math worksheets, he will engage in aggression and elopement, which is maintained by escape from the tasks.”

# COMPETING BEHAVIOR PATHWAY

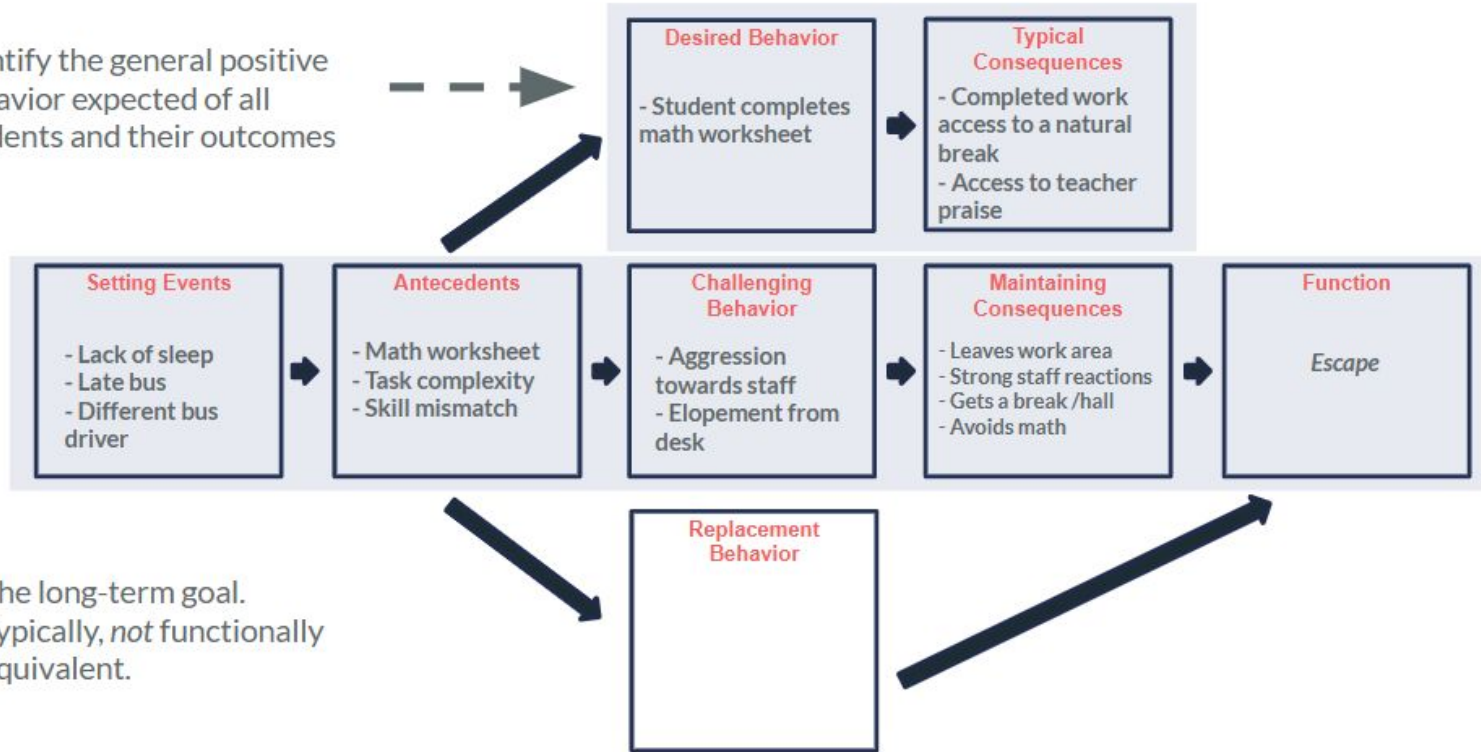

2. Add additional variables identified by the team and the data (ABC, Interviews, etc.).

The team must agree on one problem behavior to operationally define and address in the plan.

# COMPETING BEHAVIOR PATHWAY

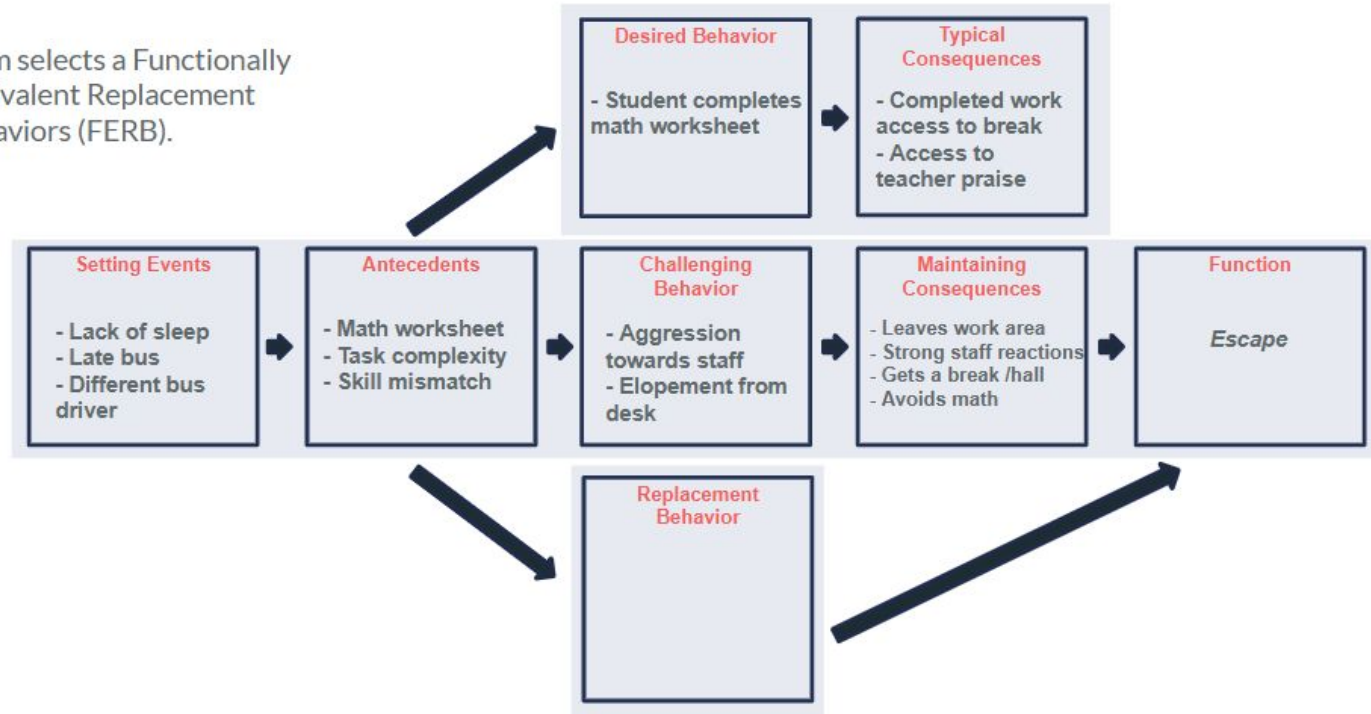

Identify the general positive behavior expected of all students and their outcomes

- The long-term goal.
- Typically, *not* functionally equivalent.

# COMPETING BEHAVIOR PATHWAY

Team selects a Functionally Equivalent Replacement Behaviors (FERB).

# REPLACEMENT BEHAVIOR GUIDELINES

- Serves the same purpose, function, as the challenging behavior.
- It needs to be something a student can do or learn to do.
- The more efficient and effective, the more likely it will be used instead of the challenging behavior.
- The rewards for engaging in the replacement behavior should be greater than engaging in the challenging behavior.

# REPLACEMENT BEHAVIOR GUIDELINES

*The replacement behavior must get the reinforcement (e.g., attention, escape, automatic reinforcement) **faster, easier, and more reliably**.*

		Behavior	Function
1	Pathway A	Tantrum behavior	Escape
	Pathway B	Two more math problems	
2	Pathway A	Hit Staff	Escape
	Pathway B	Search for the correct word on their AAC device	

# FUNCTIONALLY EQUIVALENT EXAMPLES

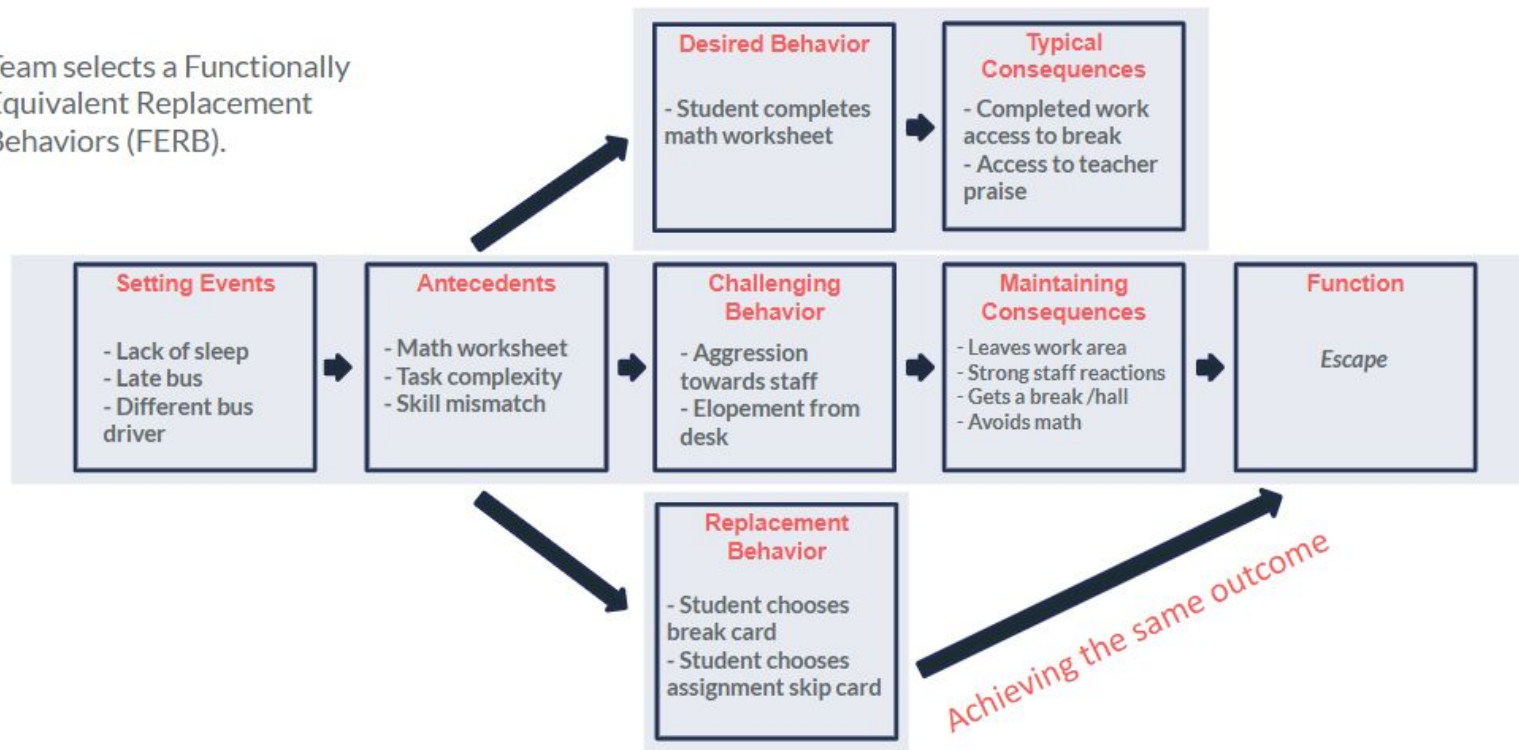

## Teach student using explicit instruction

- Signal a need for help appropriately
- Use a “calming break” pass
- Ask for reduced demands (homework pass)
- Ask for more time to complete a task
- Request a movement break
- Request an alternative activity
- Complete shortened versions of the task

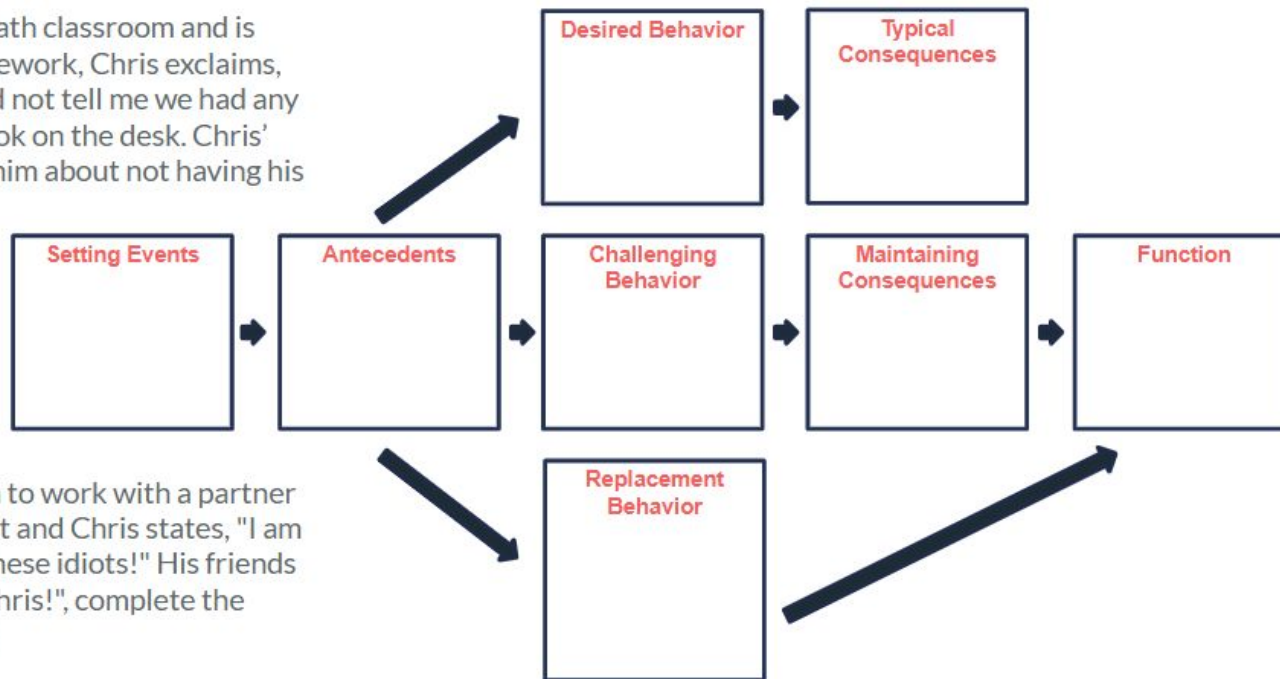

# COMPETING BEHAVIOR PATHWAY

Team selects a Functionally Equivalent Replacement Behaviors (FERB).

# COMPETING BEHAVIOR PATHWAY

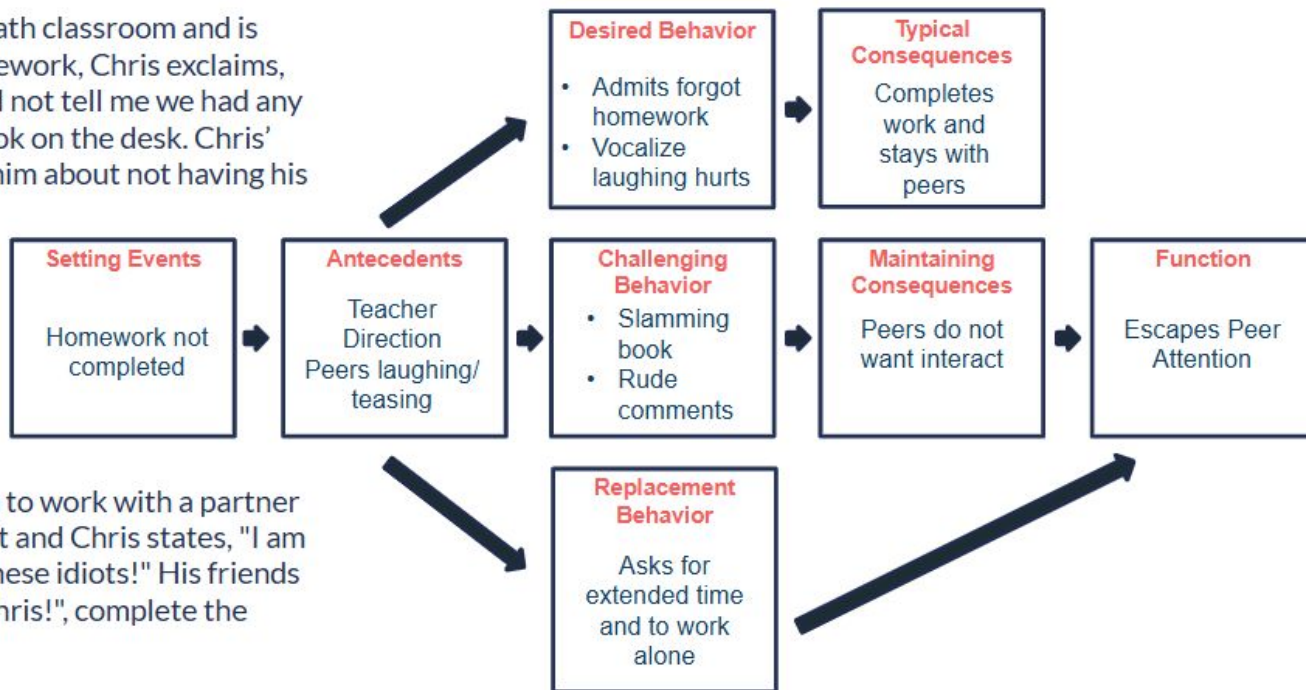

When Chris enters the Math classroom and is asked to take out his homework, Chris exclaims, "what homework? You did not tell me we had any homework!" "Slams his book on the desk. Chris' peers all laugh and tease him about not having his work complete.

The teacher redirects him to work with a partner to work on the assignment and Chris states, "I am not working with any of these idiots!" His friends turn and say "\$@\*# you Chris!", complete the assignment on your own!

# COMPETING BEHAVIOR PATHWAY

When Chris enters the Math classroom and is asked to take out his homework, Chris exclaims, "what homework? You did not tell me we had any homework!" "Slams his book on the desk. Chris' peers all laugh and tease him about not having his work complete.

The teacher redirects him to work with a partner to work on the assignment and Chris states, "I am not working with any of these idiots!" His friends turn and say "\$@\*# you Chris!", complete the assignment on your own!

# COMPETING BEHAVIOR PATHWAY

- The link between the FBA and the BIP
- Is used to determine a functionally equivalent replacement behavior
- Helps ensure that the BIP is a function based intervention plan

# PREVENTATIVE STRATEGIES

<b>Escape</b>  Scheduled Breaks Offer choices Break down task	<b>Attention</b>  Regular Attention Given Assign classroom helper roles Seating arrangements
<b>Tangible</b>  Build access in to schedule Model requesting access	<b>Sensory</b>  Sensory diet Visual schedule

# TEACH A REPLACEMENT

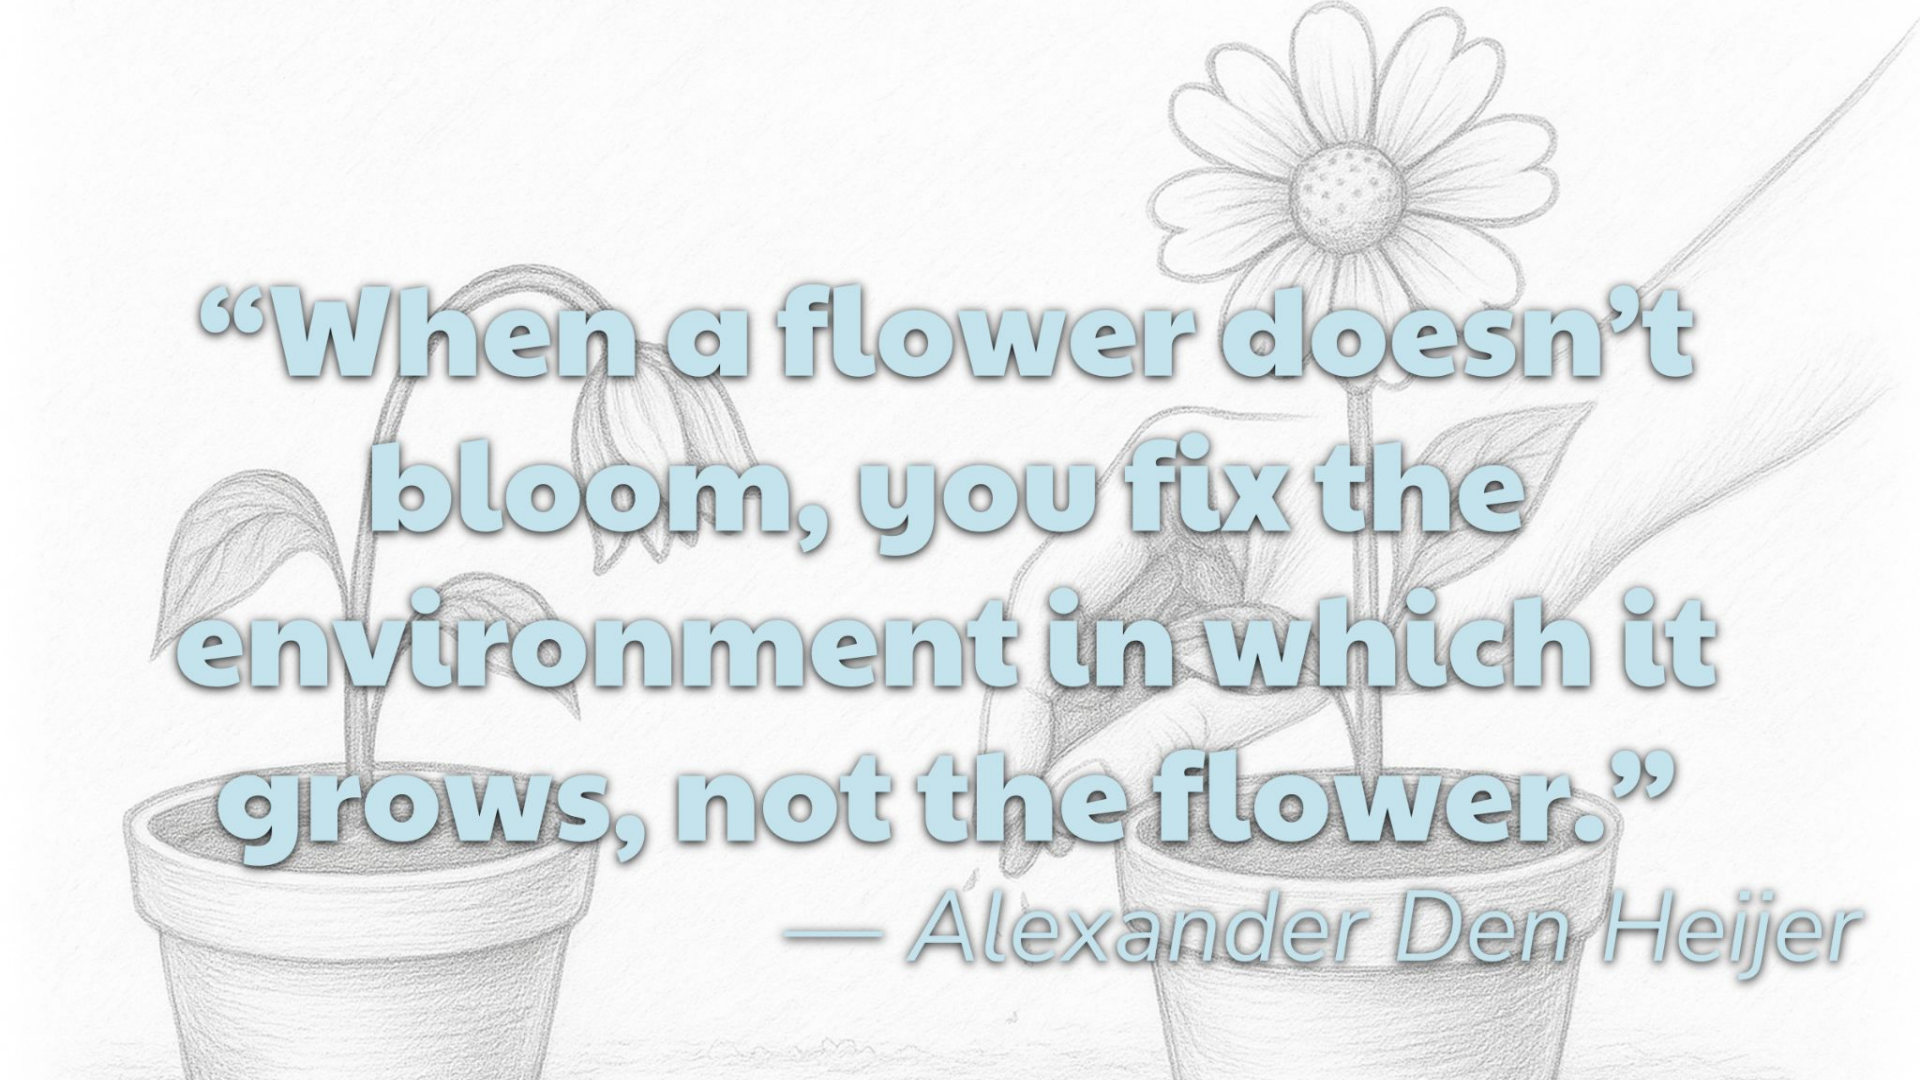

<b>Escape</b>  Ask for break Give break card	<b>Attention</b>  Raise hand Teach greetings
<b>Tangible</b>  Honor communication Teach to ask for more time	<b>Sensory</b>  Teach appropriate time/place Provide alternatives

# RESPONSE TO A DESIRED BEHAVIOR

<b>Escape</b> <ul style="list-style-type: none"><li>• Allow break upon request</li><li>• Allow choice time while gradually increasing time on task</li></ul>	<b>Attention</b> <p>Respond with high quality attention when replacement behavior occurs.</p>
<b>Tangible</b> <ul style="list-style-type: none"><li>• Allow access when replacement behavior occurs</li><li>• Allow access after specified wait time</li></ul>	<b>Sensory</b> <ul style="list-style-type: none"><li>• Engaging in the behavior itself is rewarding</li><li>• Provide behavior specific praise</li><li>• Allow access to sensory activities</li></ul>

# RESPONSE TO IMPEDING BEHAVIOR

<b>Escape</b> <ul style="list-style-type: none"><li>• Reduce demand expectations (with caution!) and deliver break</li><li>• Prompt replacement behavior. Provide short break</li></ul>	<b>Attention</b> <p>Planned ignore (impeding behavior), redirect to replacement behavior</p>
<b>Tangible</b> <p>Prompt replacement behavior If item has to be denied, offer different choices</p>	<b>Sensory</b> <p>Redirect to replacement behavior and reinforce</p>

**“When a flower doesn’t  
bloom, you fix the  
environment in which it  
grows, not the flower.”**

*— Alexander Den Heijer*

**“Tier 2 is the gardener’s hand: guiding, supporting, and scaffolding growth for every student.”**

**“What we see above the soil is only part of the story. A plant’s roots always hold the reasons for how it grows.”**

# RESOURCES

## Wayne RESA Autism Behavior Lab

Autism Behavior Lab – October 15, 2024

Presented by Wayne RESA Autism Coaches:

Content utilized includes:

- Applied behavior analysis concepts
- Behavior intervention planning frameworks
- Visuals and examples related to behavior pathways, function, and intervention alignment

## Oakland Schools

Comprehensive Functional Behavior Assessment and Behavior Support Planning

Authored and presented by:

Fatima Othman, MAT, BCBA, LBA

Special Populations Behavior Consultant, Oakland Schools

Content utilized includes:

- FBA components and definitions
- Behavior support planning structures
- Example strategies and planning tools
